Session 6: Working with Copy: What to Edit?

- Which edits are critical?
- Which edits are needed for access?
- Which edits are needed for serials control?
- How do I edit a pre-AACR2 record?
- How do I edit a pre-CSR record?
- What doesn't need to be changed?

1

Criteria for Editing Copy

- Local decision
- Report the desired change to your utility?
- Added value for end users and processing staff
- Other fields may need editing:
  - Input standards for local system and utility
  - Deriving reports from your system

2

Keep in Mind …

- Do not edit records to conform to new standard
- Do not delete data unless incorrect
- Records may contain a mix of old and new practices (as always)
- Watch out for consolidation of CONSER records

3

Do Not Edit:

- ”Minor” changes in place of publication that do not affect the 008 fixed field coding for Country of Publication; e.g., changes in city, but not state or country of publication
- Numerous numbering peculiarities (515 fields)
- Variations in subtitle or other title information

31

Summary

- Compare the pieces in hand with copy selected to determine whether changes have occurred
- Limit editing to:
  - **Critical edits (major changes, etc.)**
  - **Fields that affect access**
  - **Fields that affect serials control**
- When possible, edit pre-AACR2 records in the style of the record
