Foreword

The Basic Serials Cataloging Workshop was the first course developed by the Serials Cataloging Cooperative Training Program, a program inaugurated in 1998 under the auspices of the CONSER Program. Since its release in 1999, the workshop has been given in numerous venues throughout the United States and has been translated into Spanish, French, and Chinese for workshops presented in Mexico, Canada, and Taiwan. The success of this course has led to the development of other workshops and today, in 2002, there are four courses with a fifth under development. SCCTP has also been hailed as a “best practice” for continuing education of librarians.

The enthusiasm and commitment of so many to this program attests to the great need for training in the area of serials cataloging. I am very grateful to the members of the SCCTP Steering Committee, to the those who have helped fund the Program: NASIG, AMIGOS, SOLINET, and PALINET, and most particularly to Cameron Campbell for his expertise and hard work in developing this very thorough course in basic serials cataloging. Thanks are also extended to the many SCCTP trainers who have brought their experience and talents to presenting this course.

Over the years since its development, the course has been revised several times. The 2002 revision reflects the 2002 revision of AACR2. In addition to revising the content, the format of the course has been revised to reflect the use of PowerPoint as the basis for the trainee and instructor manuals and distribution in PDF format. Course contents have also been expanded in some cases based on suggestions from experienced trainers. I want to thank Les Hawkins, Ann Ercelawn, Steve Shadle, and Valerie Bross for their very useful comments and suggestions.

Further course materials will be developed based on demand as expressed on the evaluation sheet in Appendix H. It is hoped that SCCTP will branch out into distance learning, mentoring, and other forms of learning as the program matures.

This workshop was designed to be given by SCCTP trained-trainers; however, anyone familiar with serials cataloging can use the materials to provide training for others. They can also be used for self-study. Comments on the materials are most welcome.

Preface

The materials in this manual are organized into nine sessions; all but session one have exercises. Some sessions are optional and portions of others are optional. Any given workshop may include all the topics or only a portion of them. Even if some material is not used in the workshop you attend, the material may prove useful reading at a later time.

Each session may start with a brief warm up exercise and will conclude with a summary of the major points presented and references to relevant CONSER documentation. Exercises have also been provided for sessions two through nine to reinforce the major points covered in the preceding material.

At the end of each workshop we ask that you fill out a brief evaluation form. This will be most helpful in refining and re-working the training materials as well as their presentation. Your help in this is appreciated.

Basic Serials Cataloging Workshop

© 2008 The Library of Congress

Workshop goals

- Identify serials and distinguish them from monographs and integrating resources
- Become familiar with MARC 21 tags used for serials
- Create original serials cataloging records
- Identify “appropriate” serial copy and needed edits
- Introduce the cataloging of electronic serials

Session 1: Introduction

- Where do serials fit in the world of continuing resources?
- How does serials cataloging differ from the cataloging of monographs and integrating resources?
- What are the accepted conventions, practices, etc.?
- What tools are available?

Serials, Seriality, and Continuing Resources

- Serials are one category of “continuing resource”
- Integrating resources are the other category
- Both exhibit *seriality* because they are issued or updated over time and can change
- They are issued in a different manner and thus, the cataloging rules for them differ

Representation of Bibliographic Resources in AACR2

Finite resources

Monographs

Continuing resources

Serials

Integrating resources

Serial Cataloging Records

- Reflect the whole publication
- Are dynamic because they incorporate changes over time
- Are cooperative creations (e.g., one library may create the record, another may update it)
- Are important to the overall control of the serial and often are essential to other records (holdings, check-in)

Successive Entry Cataloging

- Convention applied to serials
- Any major change results in the creation of a new (successive) record
- Records are linked using 780/785 fields

Summary

- Serials are one type of *continuing resource*
- Serials are dynamic publications that exhibit many variations over the course of their publication history
- There are many useful tools in print and online to assist serials catalogers

Session 2: What is a Serial?

- What is the definition of a serial?
- What are the common characteristics of serials?
- What types of publications are or are not typically cataloged as serials?
- What MARC tags are most commonly used for serials?

Definition of a Serial

A continuing resource

- issued in a succession of discrete parts
- usually bearing numbering
- that has no predetermined conclusion

Important Elements of the Definition

- Succession of discrete parts
 - Usually issues, could be numbered articles
- Numbering (usually)
 - Needed to distinguish issues
 - “Usually” refers primarily to unnumbered series
- No predetermined conclusion

Also Treat as Serials:

- Publications of limited duration (AACR2 12.0A)
 - Have similar characteristics and functions of serials but have a predetermined conclusion
 - Examples: Newsletters from conferences, quarterly reports of projects, etc.

Identifying Characteristics

- ISSN:
1096-6919
0895-495X
- Frequency in title:
AB Bookman's weekly
Annual report of the Academy of Sciences
of Estonia
Yachting monthly

Identifying Characteristics

- Enumeration/chronology:
Volume 28
Vol. 32, No. 10 September 1997
Spring 1997
1998-1
- Year(s) of coverage:
1997 (item published in 1998)
... for the fiscal year 1995
... covering the period July 1978 through
June 1979

Identifying Characteristics

- Intent to continue publishing:

Preface:

The inaugural issue of Advances in the Theory of Computation and Computational Mathematics ... Future volumes of ATCCM ...

- Certain titles:

Advances in accounting

Developments in aging

Progress in theoretical organic chemistry

Trends in African linguistics

Non-serials: Monographs (print)

- Books issued in parts (fascicles)
- Cartographic materials (most)
- Censuses
- Encyclopedias
- Hearings
- Five-year plans

Non-serials: Integrating Resources

- Updating Web sites
- Updating online databases
- Updating loose-leafs

Special Types of Resources

Frequently issued editions:

Catalog as a serial only when published every year or two; otherwise treat as monograph

Special Types of Resources

Conference publications

- Catalog as serial if it fits the definition
The 48th Annual Meeting of the National
Athletic Trainer's Association

Conference Proceedings, Animal
Transportation Association 17th
International Conference,
September 29-October 2, 1991
- Do not catalog as a serial if there are distinctive
titles or conference is in a numbered series

Conference Publications

Split treatment:

500 -- \$a Issues for 1993-1995 conferences
cataloged separately. \$5 [NUC symbol]

500 -- \$a Beginning with the 5th conference,
issues are cataloged separately. \$5 [NUC
symbol]

or

590 -- \$a Issues for 1993-1995 conferences
cataloged separately.

590 -- \$a Beginning with the 5th conference,
issues are cataloged separately.

Resources Issued in Loose-leaf Format

- Catalog as serial if:
 - Resource is a serial whose successive issues are stored in a binder
 - Base volume is regularly issued (e.g., annual with updates during the year)
- Catalog as an integrating resource if:
 - Updates are interfiled and base volume is irregularly revised

Supplements

Supplements may be separately cataloged as serials when they have their own title and/or numbering

Opportunity Magazine
Vol. 1, no. 1 (Jan. 1923)-

The Annual Buyers' Guide of Success Secrets
1997-

Public Health Reports
Vol. 11, no. 1 (Jan. 3, 1896)-v. 85, no. 12
(Dec. 1970)

Supplement ... to the Public Health Reports
No. 1-no. 213

Reprints of Serials

Catalog as serials unless the reprint includes only a single issue or a collection of unrelated serials

Serial: Black Mountain review. Reprint, with an introduction added, of a publication issued (quarterly 1954, annually 1955-1957) in Black Mountain, N.C. by the Black Mountain College and edited by Robert Creely.

Monograph: Prague spring. A collection of articles from newspapers published in Czechoslovakia during the years 1966-1968.

Monographic Series

Series may be cataloged as a serial or each issue of the series may be cataloged separately

Summary

- Three criteria for serials: successive parts, numbering, no predetermined conclusion
- Certain resources require special considerations relating to access, control, etc.
- When unsure, review LCRI 1.0, search for records on databases, consider the needs of your library
- MARC tags for serials include special note fields and linking fields

Key Elements in the Fixed Field

- Publication status = currently published, “dead,” or unknown
- Beginning/ending dates = base this on year(s) in 362; when combined dates, use the last (e.g. 1993/1994)
- OPTIONAL codes:
 - Frequency = how often the serial is published
 - Regularity = is the frequency regular or not

More Elements in the Fixed Field

- Original alphabet = NSDP or ISSN Canada use only
- Type of continuing resource = monographic series, newspaper, periodical, or none of the above
- Entry convention = all current serial records are coded as “0” for successive entry

Sample Record Fixed Field Coding

- Publication status c (current)
- Beginning/ending dates 19uu, 9999
- Frequency ■ (optional)
- Regularity ■ (optional)

 500 -- \$a Description based on first issue.

Former Practice: Pre-CSR

- If cataloging from first issue:
 - 362 0- Formatted numbering statement
 - No 500 “Description based on” note
- If not cataloging from first issue:
 - No 362 0- Formatted numbering statement
 - 500 “Description based on” note
- If not cataloging from first issue, *but* have information about it:
 - 362 1- Unformatted numbering statement (note)
 - 500 “Description based on” note

For Example ...

Have first issue:

362 0- \$a Vol. 1, no. 1 (Jan. 2001)-

Don't have first issue:

500 -- \$a Description based on Vol. 1, no. 2

Don't have first issue, *but* have information about it:

362 1- \$a Began with v. 1, no. 1 (Jan. 2001).
500 -- \$a Description based on Vol. 1, no. 2
(Apr. 2001).

Chief Source: What Source Within the Issue?

- Title page
- Title page substitutes (preferred order):
 - analytical title page (for series)
 - cover
 - caption
 - masthead
 - editorial pages
 - colophon
 - other pages
- Note chief source (even if title page)
 - Combine with “Description based on” note:
Description based on first issue; title from cover.
Description based on Jan. 2003; title from t.p.

245 00 \$a Tennessee ancestors : \$b a tri-annual
publication of the East Tennessee Historical Society.
500 - - \$a Description based on: Vol. 14, no. 3 (Dec. 1998);
title from cover.

Summary

- Base the description on the chief source of the first or earliest available issue in hand
- The chief source is the title page or its substitute (cover, caption, etc.)
- Most serials are entered under title
- Uniform titles are sometimes used to distinguish different serials with the same title (entered under title)
- Record the title proper as it appears on the chief source, except for capitalization, punctuation and omissions
- Record other title information when considered useful
- There are important differences between the CONSER Standard Record and former practice

Session 3: Exercises

Use the workforms provided in Appendix D to record the cataloging data from the information provided in the following pages.

1. Select the chief source;
2. transcribe and tag the title proper;
3. select and tag a main entry, if any;
4. make any title added entries thought useful;
5. and, indicate any other title related notes thought appropriate (i.e., source of title, DBO, latest issue consulted)

Summary

- Be careful with “editions”
- Record numbering information in 362
- Record a source of title note even if it is the title page
- Always supply a “Description based on” note
- Notes should be useful and not too detailed

Session 4: Exercises

Complete the workforms used in the exercises for session three by adding the following cataloging data:

1. Imprint information;
2. Frequency information (also indicate the fixed field coding);
3. Designations, if appropriate;
4. Additional notes thought appropriate;
5. and, other added entries thought appropriate.

Session 5: Working with Copy: Finding Appropriate Records

How do I identify the "most appropriate" serial record?

- Is it the same publication?
- Is it for the right physical format?
- Do the dates fit?
- Is the record AACR2?
- How authoritative is the record?

Is the Publication the Same?

Session 6: Working with Copy: What to Edit?

- Which edits are critical?
- Which edits are needed for access?
- Which edits are needed for serials control?
- How do I edit a pre-AACR2 record?
- How do I edit a pre-CSR record?
- What doesn't need to be changed?

Criteria for Editing Copy

- Local decision
- Report the desired change to your utility?
- Added value for end users and processing staff
- Other fields may need editing:
 - Input standards for local system and utility
 - Deriving reports from your system

Keep in Mind ...

- Do not edit records to conform to new standard
- Do not delete data unless incorrect
- Records may contain a mix of old and new practices (as always)
- Watch out for consolidation of CONSER records

Do Not Edit:

- "Minor" changes in place of publication that do not affect the 008 fixed field coding for Country of Publication; e.g., changes in city, but not state or country of publication
- Numerous numbering peculiarities (515 fields)
- Variations in subtitle or other title information

Summary

- Compare the pieces in hand with copy selected to determine whether changes have occurred
- Limit editing to:
 - Critical edits (major changes, etc.)
 - Fields that affect access
 - Fields that affect serials control
- When possible, edit pre-AACR2 records in the style of the record

Session 6: Exercises

Part A

Compare the bibliographic information to data on the issues received. Modify copy following the CONSER Standard Record guidelines.

Part B

Compare the bibliographic information about the issue in hand given in the following pages with the copy provided and indicate any editing necessary. The copy may not include all MARC tags.

Part C

Edit the copy provided to indicate cessations based on the information provided.
