

Original Minicat Procedures

Monographic K-Level Records

Background

Selected monographic materials with no OCLC copy are to be cataloged at the minimal level. No subject headings and classification will be assigned. Follow the procedures outlined below to input original K-level records in OCLC.

Cataloging Tools & Documentation:

- OCLC *Bibliographic Formats & Standards*
"When to Input a New Record" (OCLC)
- OCLC MARC Code Lists
- YRL Cataloging Policies and Procedures
Cataloging Materials for the SRLF
- AACR2
- LCRIs
- MARC21 for Bibliographic and Authority Data

Procedures for Cataloging Original Minicat:

1. Search OCLC to make sure there is no record that matches the item in hand.
 - A. If there is a matching OCLC monographic record:
 - Process as a regular minicat with copy. (See "Minicat Procedures" for guidelines.) *NOTE: This document does not yet exist.* If you are unsure whether or not a record matches the item you are cataloging, consult the OCLC page "When to Input a New Record" (see link above), which has both general guidelines and field-by-field guidelines. If questions remain, consult a supervisor.
 - B. If there is a different edition or a different format (i.e. paper vs. microfiche):
 - Use that record to create a new bibliographic record. (See "Creating a New Record from a Different Edition/Format Bibliographic Record" for guidelines.)
 - C. If there is no matching or similar OCLC record:
 - Input a new bibliographic record based on the item you have on hand.

NOTE:

1. Every record must have, at a minimum, a 245, 260, and 300 fields (and a 1XX or 7XX, if appropriate).
2. Search ORION before searching OCLC. If there is a matching record in ORION, set the item aside.
3. When searching OCLC, be alert to the possibility that the item you have may be a serial, not a monograph. If the only record you find for the item is a serial record, make a printout and set aside for review. If there are multiple records for same title, check records to see if one of them is a serial record, and if a serial record exists, set item aside for a supervisor.
4. **Multi-volume sets:** If the item in hand is part of a volume set, you will need to indicate our holdings in the 049 \$v subfield **before** you update the record.

Example:

If the item is an incomplete multi-part item (i.e., 300 \$a v.), and you have vols. 1-4, the \$v should read "\$v v.1-4"

If the item is an incomplete multi-part item, and you have vols. 1, 3-4, and 7, the \$v should read "\$v v.1,3-4,7"

Consult with a supervisor if you have any questions.

Creating a New Bibliographic Record:

- A. From the Edit menu, choose Workform and then select Books.
- B. Input fields (as indicated below):

Fixed Fields	ELvl: K Lang: assign the appropriate code from the MARC Codes for Languages Form: if item is a reproduction, assign the appropriate code Ctry: assign appropriate code from MARC Codes for Countries GPub: for government publications, assign the appropriate code Desc: a Ills: assign the appropriate code for illustration terms in the 300 field DtSt: code: s=single date, m=multiple dates Dates: enter single or beginning date of publication in Date1; enter ending date of publication if appropriate in Date2
---------------------	---

020 (ISBN)	Record the ISBN, if present. Do not transcribe hyphens. If the item has ISBNs for hardcover and paperback “editions,” input both numbers in separate ISBN fields. For multi-volume sets, enter the ISBN of the set only (if present). If no set ISBN, input ISBN for 1st volume in hand.
049	CLUR \$n ASK AT YRL PUBLIC SERVICE DESK—In process for SR [Apply SRLF MACRO for 049 and 910. Note: 910 qad/initials date]
100/700, 110/710, or 111 Main entry: Personal, Corporate or Conference Name):	If the item has three or fewer authors, record the first named author in the appropriate 1XX field, and the additional authors in separate 7XX fields. If the item has more than three authors: - do not input a 1XX field - use a 7XX field for the first named author. If there is no author: - leave the 1XX/7XX fields blank. If there is no author, but there is an editor, compiler, etc.: - record the name in field 7XX. If unsure whether the Corporate or Conference name should be a 1XX or a 7XX, consult a supervisor. Search for the correct form of the heading (personal, corporate or conference) in ORION and/or the OCLC Authority File. If a personal name or corporate name is not found in ORION or OCLC, use the form of the name as found on the item (last name first for personal names except in special cases). Do not include dates in personal names even if the information is readily available on the item in hand.
245 \$a and \$b (Title and other title information):	Transcribe the title in field 245 according to the following pattern: When a 1XX is present: 245 10 \$a Title : \$b other title information. When no 1XX is present: 245 00 \$a Title : \$b other title information. <i>NOTE: The 2nd indicator of the 245 field varies to reflect the number of non-filing</i>

	<i>characters (i.e. initial articles) present</i> Transcribe the title as it appears on the title page or container. If the book lacks a title page, record the title as it is found on the cover or other source, adding a note to indicate the source of the title (see 5xx field guidelines below). Capitalize the first letter of the first word of the title and the first letter of proper nouns. Use the \$b subfield for other title information, such as subtitles, parallel titles, etc. Do not transcribe a statement of responsibility, unless a conference name is present but not recorded in a 1xx or 7XX. If the work is a microform reproduction, add \$h [microform] immediately following the \$a.
246	If the title recorded in field 245 is in English and contains an ampersand (&), create a 246 field with the word “and” in place of the ampersand (first indicator 3, second indicator blank). If the title recorded in field 245 \$a has an obvious typographical error, create a 246 field with the corrected spelling (first indicator 3, second indicator blank). If there is a parallel title, create a 246 field for that title (first indicator 3, second indicator 1).
250	Record edition statements, if present, in field 250. Abbreviate the term used for edition (ed., Aufl., etc.). Convert numbers to Arabic ordinal numbers if necessary (i.e. “fifth” to 5th.).

260	Record the place of publication, the name of the publisher, and the date(s) of publication according to the following pattern: 260 \$aPlace of publication : \$b Name of publisher, \$c date(s) of publication • If there is no place of publication, use [S.l.]. • If there is no publisher, use [s.n.]. • For the date, prefer a publication date to a copyright date. If there is no publication date, record the latest copyright date preceded by “c.” If there is no date of publication or copyright, estimate the date and enter in square brackets. • If the item is a complete multi-part monograph, record the first and last dates (e.g. \$c 1997-1998). If the item is an incomplete multi-part monograph, record the first date only followed by a hyphen (e.g. \$c 1997-); however, if you do not have the first volume, enter the first date of the volume(s) you do have in angle brackets (e.g. \$c <1997>-). <u>Date Examples:</u> <table><tr><th>260 \$c</th><th>DtSt</th><th>Date1</th><th>Date2</th></tr><tr><td>2002</td><td>s</td><td>2002</td><td>blank</td></tr><tr><td>1998-</td><td>m</td><td>1998</td><td>9999</td></tr><tr><td>1998-2003</td><td>m</td><td>1998</td><td>2003</td></tr><tr><td>[199-?]</td><td>s</td><td>199u</td><td>blank</td></tr><tr><td>[19--?]</td><td>s</td><td>19uu</td><td>blank</td></tr></table>	260 \$c	DtSt	Date1	Date2	2002	s	2002	blank	1998-	m	1998	9999	1998-2003	m	1998	2003	[199-?]	s	199u	blank	[19--?]	s	19uu	blank
260 \$c	DtSt	Date1	Date2																						
2002	s	2002	blank																						
1998-	m	1998	9999																						
1998-2003	m	1998	2003																						
[199-?]	s	199u	blank																						
[19--?]	s	19uu	blank																						
300	Record the extent of item in pages or volumes in field 300. • For single-volume works, input the last numbered page. • For complete multi-volume sets, input the total number of volumes. • For incomplete multi-volume sets, use “v.” • For items with no numbered pagination, complicated pagination, use “1 v.”																								
4XX	If there is a series statement present on the item: • search the series title in ORION and in OCLC. If series treatment is the same in both files, follow that tracing practice in the record. • If our local treatment varies from the national authority record, consult with a supervisor.																								
5XX	If the source of the title is something other than a title page, indicate the source in																								

	a 500 field: 500 Cover title.
5XX	Add 5XX fields, if appropriate.
655	Add, if appropriate.
7XX	Add, if appropriate (see instructions in 100 Field above).
8XX	Same as 4XX above.
910	qad/[initials] [date]

Record statistics (Minimal w/Copy or Minimal No Copy).

Write OCLC number in item (below SRLF/YRL Stamp).
