Section I. Introduction

The BIBCO standard record (BSR) and associated metadata application profiles (MAPs) are the results of work done by thirty-one catalogers and cataloging managers from twenty-five institutions. This work took place between March 2009 and June 2010.

The concept of a BIBCO standard record was first discussed at the Program for Cooperative Cataloging Policy Committee meeting at the Library of Congress held November 6-7, 2008. The discussion was based on the success of the CONSER standard record, discussions among members on series statements in monographic records, and the work of the BIBCO Training Materials group. The initial BIBCO Standard Record project was carried out to develop a “model” for bibliographic records using a single encoding level to replace the previous BIBCO full and core levels; to use the previous BIBCO core level record as a starting point; and to focus on a model for the printed monograph to be used as a basis for models for other formats. The resulting BIBCO standard record is now extensible to eight metadata application profiles, including textual monographs, rare books, cartographic materials, notated music, sound recordings, moving image materials, graphic materials, and electronic resources.

The BSR is a floor record which emphasizes access points over extensive, redundant descriptive data. Metadata application profiles provide catalogers with a set of mandatory elements and mandatory if applicable elements appropriate to bibliographic formats. These elements have been determined to support user needs to find, identify, select, and obtain resources. Authority records must support controlled access points in a BSR.

BIBCO Standard Record Training Documentation

November 9, 2011

Catalogers taking part in the training should be experienced in using recognized cataloging standards. They should already be trained in preparing name authority records for the NACO program or a NACO funnel. The BSR training documentation does not include basic teaching of cataloging rules or rules in preparing authority records. However, it is expected that during the training some questions about specific use of a rule might need to be addressed by the trainer.

The training documentation is intended to be used online. Catalogers are provided with specifics of the BSR, what MAPs contain, and how they are used together to describe and give access to library resources. Examples of records in each format represent the idea of records being “as full as is necessary.” Discussion points assist catalogers in learning how decisions are made about user needs, cataloger judgment, and local policy, while reinforcing the characteristics of the BSR. Elements in the MAPs are accompanied by use values and, in some cases, prescription for subfields or other basic points. It is recognized that institutions may not want or need to use the BSR for every format. Links are placed at the beginning of the examples to allow catalogers to go directly to the MAPs and format examples they need and to return back to the list of formats.

The training documentation can be used in one of two training scenarios. In the first scenario, a trainer would be on-site to go through the online documentation with the catalogers. During and after the session, the trainer is available to answer questions and initiate discussions about any of the BSR concepts. In the second scenario, catalogers would read the online documentation at their own institution. A trainer would address questions and promote discussion either by conference call, e-mail, or any other means that can be set up. It is expected that either training session will last up to one day depending on the number of catalogers.

After training, the catalogers at the institution will prepare a designated number of bibliographic records to be reviewed by the trainer. Only after a successful review is completed for all the catalogers will the institution be released for its catalogers to prepare BSRs on their own.

BIBCO Standard Record Training Documentation
November 9, 2011

Section II. Course summary

Training focuses on the BIBCO standard record for monographic materials in various formats. It prepares experienced catalogers to contribute BIBCO program records to shared databases. It identifies the elements of the BIBCO standard record. It also presents the floor-level record model and options to add elements to it to create a record that fits the particular resource and satisfies local cataloging policy.

Objectives—At the end of this course, participants will be able to:

1. Describe the characteristics of a BIBCO Standard Record (BSR)
2. Recognize that knowledge of cataloging standards should support cataloger judgment
3. Apply the Metadata Application Profile (MAP) to provide required elements in BSR records
4. Recognize that established name and subject authority headings support BSR access points
5. Determine how cataloger judgment and local policy can affect the choice of additional elements beyond those mandatory and mandatory if applicable elements used in a BSR

BIBCO Standard Record Training Documentation
November 9, 2011

Section III. BIBCO standard record

Characteristics of the BSR

- A. The BSR is a “floor” record containing a mandatory element set. Emphasis is given to access points, not to extensive descriptive data. The BSR supports the importance of controlled subject and name access points in library catalogs.
- B. Regardless of the fullness of a BSR, only one encoding level is used.
- C. The mandatory element set combines use of those elements that are mandatory and those elements that are mandatory if applicable. It avoids requiring unessential and redundant elements. Essential elements support user needs to find, identify, select, and obtain needed resources.
- D. BSRs are considered to be as full as is necessary for user tasks. The uniqueness of individual resources is represented by adding elements that are mandatory if applicable for the item in hand. In addition, elements not included in the essential element set may be added if determined to be important for access by cataloger judgment and/or local policy.
- E. Main entry headings (1XX), added entries (7XX), and subject headings (6XX) are supported by authority records established through the NACO and SACO programs.
- F. Using the defined element set in the BSR will support greater uniformity in bibliographic record data and will enable catalogers to focus on providing appropriate added access.
- G. BSR content is supported through use of the MARC 21 Format for Bibliographic Data.
- H. The BSR is intended for use by experienced catalogers knowledgeable in AACR2, LCRIs, and standardized classification and subject heading systems assigned codes in the MARC 21 formats.

BIBCO standard record terminology

Before moving on to the metadata application profiles (MAPs) and associated record examples, it would be good to go over some of the terms presented in the introduction section and in the BSR characteristics section. The following terms will be used frequently when going over the record examples: “floor record,” “essential elements,” “user needs,” and “records that are as full as is necessary.”

- A. Floor records

BIBCO Standard Record Training Documentation

November 9, 2011

Floor records include essential elements for user needs. Additional elements can be added to floor records if a cataloger determines that the added elements provide added access to the resource.

B. Essential elements/user needs

These two terms are often used together. Essential elements are those that fulfill user needs—those being to find, identify, select, and obtain resources. These elements are used for description and controlled access fields.

C. Records as full as is necessary

These are records that when completed meet all the requirements of user needs. Cataloger judgment and local policy have been used to determine the appropriate descriptive and controlled access.

D. Cataloger judgment and local policy

Use of the BSR is determined ultimately by two activities. Rather than using every possible field in every record, the BSR allows catalogers to use trained judgment for determining which elements are the most important to use. Judgment is based on knowledge of national standards and user needs.

E. Local policy

The cataloging environment is affected by interior and exterior forces; these are addressed by setting priorities for workflows that affect how catalog records are prepared. Local policies range from controlled cataloging structures where original catalogers use a similar record model in all cases, to less controlled structures, where many record models are available for catalogers to use. Local cataloging policy affects how the BSR will be used in an institution's cataloging workflow.

Section IV. Metadata application profile (MAP)

The metadata application profile is a list of fields and field-specific information. It includes a mandatory element set along with elements that are mandatory if applicable. Both support use of only essential elements appropriate for use with the item and format. Use of redundant elements is avoided except where necessary due to display requirements; for example, two elements for language are added.

A MAP does not preclude use of any additional elements in a bibliographic record. However, additional elements should be based on their importance in assisting with user needs. The elements in the MAPs are supported by MARC 21. Extensive prescription is not given for the elements as they relate to AACR2. Unless otherwise noted, all indicators and subfields related to an element may be used when appropriate to the resource being cataloged. Some positions are given codes to reinforce their pertinence to all MAPs.

BIBCO Standard Record Training Documentation

November 9, 2011

There are eight MAPs. Each MAP is preceded by scope notes general to all the MAPs and specific to the format it covers. Each MAP has some codes, common across the formats, to indicate that the cataloging record has been created (or upgraded) by a BIBCO cataloger. BSRs are required to have the following codes that identify them as PCC BIBCO program records:

- Leader 17 Encoding level: blank; used by authorized national agencies and libraries participating in PCC
- 008/39 Source code: “c” to indicate that the creator of the cataloging data is a participant (other than a national bibliographic agency) in a cooperative program; blank code to indicate that the creator of the cataloging data is a national bibliographic agency, such as the Library of Congress or Library and Archives Canada
- 042 Authentication code: “pcc”; confirms that the record is authenticated under the auspices of the Program for Cooperative Cataloging

Descriptive fields

MAPs do not include detailed cataloging prescription for descriptive fields. Catalogers are expected to consult the appropriate chapters in AACR2, the LCRIs, and information from other recognized standards when preparing descriptive data for bibliographic records. Note fields in the MAPs are for the most part mandatory if applicable. Cataloger judgment and local policy play important roles in how many additional notes might be used. Careful assessment is needed as to why notes other than those with use codes of mandatory or mandatory if applicable are used in a BSR.

Access fields

The second area includes headings in 1XX, 6XX, 7XX, and 8XX access fields. All headings in these fields need to be supported by authority records. Added entries in 7XXs are provided for persons and corporate bodies only if they have a significant relationship associated with the resource being cataloged.

Series in BSR MAPs

Use of series in BSRs is governed by the PCC policy, which states: members may optionally trace or not trace a series statement in a BSR as a 490/8XX combination (traced) or as an untraced 490. Standard rules for description under AACR2 and the LCRIs continue to require transcribing a series statement in a BSR. PCC members who continue to trace series in bibliographic records must continue to search the LC/NACO Authority File for authorized forms of series and create or revise records as necessary. Individual library local policy and cataloger judgment are used to determine use of series in bibliographic records.

Upgrading copy

Existing records that do not meet the criteria for usable copy can be upgraded to PCC records. Catalogers should use BSR concepts along with the appropriate MAP to determine addition of elements. When upgrading copy, follow guidance provided in AACR2, LCRIs, and standardized classification and subject heading systems.

BIBCO Standard Record Training Documentation

November 9, 2011

Section V. Assessment

Before moving on to the next section, it might be good for catalogers to assess what they understand about the information presented in sections I-IV. The two lists in this section are provided as guides to promote self-evaluation and group discussion about the BSR and MAP. The first list prompts catalogers to assess their understanding of BSR concepts, elements in a MAP, and terms used in the previous sections. The second list provides questions to elicit discussions about how use of BSRs might impact the local cataloging workflow, user needs, and possibly other library functions. Information already presented should be consulted as much as is needed. The BSR and MAPs present new ideas for preparing bibliographic records.

Understanding the BSR concepts, MAPs, and terminology

This list presents some concepts and terms. It can be used by individual catalogers. However, group discussions may help to clear up any confusion or misunderstanding about the terms. Group discussions should be moderated by the BIBCO trainer.

1. Floor record
2. As full as is necessary
3. Element set
4. Emphasis on access
5. Essential elements
6. User needs
7. Primary and significant relationships (resource and authors)

Impact of BSRs on the local institution

Questions in this list should be addressed in a group situation. Library staff from other departments, such as public services, could join catalogers in the discussions. Discussions should be moderated by the BIBCO trainer and BIBCO liaison.

1. BSRs emphasize access over description. Are there categories of materials in a collection that would benefit by the addition of more descriptive fields, e.g., more notes? If so, why?
2. Would less-than-full records impact your library users?
3. How could cataloger judgment and/or local policy affect the public catalog display?
4. What kinds of policy changes might have to be made in copy cataloging departments when using BSR copy?
5. How would the use of BSRs affect other library services?

Section VI. Using the Metadata Application Profiles (MAPs) and BSR examples

This section covers BSR concepts and characteristics, together with the MAP elements used to prepare the bibliographic record examples. Catalogers should read the following information before accessing the individual MAPs and BSR examples.

The process to go over the MAPs and BSRs together begins with the selection of a MAP from the list below. Catalogers need to go over the MAP to learn the type of material it covers, the elements included, and field-specific notes. Following each MAP is at least one BSR example. For the purpose of generating discussion, the examples represent less-than-full records. Catalogers should study these examples and consult the MAPs to see how the mandatory and mandatory-if-applicable elements are used in them. Questions after each example are provided to prompt discussions about relationships of elements in the record, BSR concepts and characteristics, user needs, cataloger judgment, and local policies. Catalogers are encouraged to reread Sections I-IV of this training documentation. In addition, AACR2, LCRIs, MARC 21, and standardized classification and subject heading systems may be consulted during this process.

List of metadata application profiles (MAPs) [each is a link to the MAP]

- A. Textual monographs
- B. Rare books
- C. Cartographic materials
- D. Notated music
- E. Sound recordings
- F. Moving image materials
- G. Graphic materials
- H. Electronic resources

A. Metadata Application Profile (MAP): BSR for Textual Monographs

This MAP is defined for printed monographs including books, pamphlets, and single sheets. (See also the MAP for Rare Books.) Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

15-17	Place of publication, production or execution	
23	Form of item	
28	Government publication	
35-37	Language	
38	Modified record	
39	Cataloging source “c” (or “blank” if initially cataloged by a national library)	
Variable data fields		
Element	Labels and notes	Use
010	Library of Congress Control Number LCCN	A
020	International Standard Book Number ISBN \$a	A
041	Language code	A
042	Authentication code \$a “pcc”	M
050, etc.	Classification number Assign at least one classification number from an established classification system recognized in the MARC 21 Format for Bibliographic Data.	M
1XX	Main entry—personal name; corporate body; meeting name; uniform title	A
240	Uniform title Supply if known or can be easily inferred from the item being cataloged.	A
245	Title \$a Required \$n, \$p, \$b, \$c Use if applicable \$h Use for microforms In cases of multiple parallel titles, minimally include the first parallel title and any English parallel title.	M
246	Varying form of title Assess each item or collection and assign titles that cover variations deemed important to assist users. The importance of varying title information is intended to reflect individual cataloger judgment and/or local policy. Code the 246 for parallel title as 246:31; all other varying titles may be coded as 246:1#.	A
250	Edition statement	A

BIBCO Standard Record Training Documentation
November 9, 2011

260	Publication, distribution, etc. (imprint) \$a, \$b, \$c Required for published materials \$a For items with only one publisher but multiple places, catalogers may give only the first place listed. \$c Use only this subfield for unpublished materials.	M
300	Physical description \$a Required \$b, \$e Use if applicable	M
490	Series statement Transcribe here the form of the series statement as it appears on the prescribed source in the item.	A
500	Source of title proper	A
501	With note	A
502	Dissertation note	A
505	Formatted contents note Contents may be encoded at one of two levels: "basic" or "enhanced". Supply as appropriate for collections, compilations, or for multi-part items with separate titles.	A
533	Reproduction note	A
546	Language note Give the language(s) of the described materials if not apparent from the rest of the description. Also describe alphabets, script, or other symbol systems appearing in the item.	A
6XX	Subject, Genre and/or Form access fields Use judgment in assessing each item. As appropriate, assign a complement of headings that provides access to at least the primary/essential subject and/or form of the work at the appropriate level of specificity. Assign such headings from an established thesaurus, list, or subject heading system recognized by the MARC 21 Format for Bibliographic Data. Follow the conventions of the particular subject heading system being used.	A
700-751	Added entry fields Use judgment in assessing each item. Assign a complement of added entries that covers the significant relationships associated with the work, expression, or manifestation of which the item is a part. The inclusion and importance of added entries are intended to reflect individual cataloger's judgment and/or local policy, in the context of shared cataloging.	A
8XX	Series added entry If local institutional cataloging policy is to trace a series, include in this field the authorized form of the series as established in the LC Name Authority File.	A

710 2 British Medical Association.

BSR Textual monographs: Example 1 Discussion

1. Would the use of a 538 field be appropriate for a CD-ROM in all cases?
2. Would the addition of a 700 name/title added entry based on the first 500 note be considered necessary for user needs? Why or why not?
3. Why is the 710 provided for the British Medical Association?
4. 006 and 007 fields are not required for accompanying material in this MAP. What is the potential usefulness of coding these fields for accompanying material?
5. This BSR includes a local note about the condition of the book.
How do local notes about a book's condition impact user needs?

BSR Textual monographs: Example 2 Discussion

Note: This book is one of many by this world-famous author of popular mystery fiction.

1. 600-651 topical subject headings and 655 genre headings are not required for works of fiction. What circumstances could influence catalogers to use them when describing this work of fiction? Or other works of fiction?
2. Under what circumstances would a cataloger decide not to trace a series?
3. The information that Meredith Mynd-Stretton wrote "Poisoned Pekoe," can be addressed in several ways in the record. Catalogers can include both a 500 note and a name/title added entry. What information about the BSR learned so far could influence decisions on how the information could be addressed or not addressed in the record?

BIBCO Standard Record Training Documentation
November 9, 2011

B. Metadata Application Profile (MAP): BSR for Rare Books

This MAP is defined for rare books, using a single encoding level. Books printed before 1500 are not included in this MAP. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

BIBCO Standard Record Training Documentation
November 9, 2011

	Supply if known or can be easily inferred from the item being cataloged.	
245-4XX	A basic difference between AACR2 and DCRM(B) is the method and extent to which bibliographic details (fields 245-4XX) are recorded. Bibliographic details should be recorded as correctly as possible, according to the style expected for the field. Transcription should follow the rules outlined in DCRM(B). As to extent, DCRM(B) provides some options for abbreviating descriptive fields, and creators of BSRs for Rare Books are encouraged to use these when pertinent.	
245	Title \$a Required \$n, \$p, \$b, \$c Use if applicable \$h Use for microforms In cases of multiple parallel titles, minimally include the first parallel title and any English parallel title.	M
246	Varying form of title Assess each item and assign titles that are required by DCRM(B) Appendix F and titles that cover variations deemed important to assist users. The inclusion of varying title information is intended to reflect individual cataloger judgment and/or local policy. Code the 246 for parallel title as 246:31; all other varying titles may be coded as 246:1#.	A
250	Edition statement	A
260	Publication, distribution, etc. (imprint) DCRM(B) has careful guidelines about providing imprint and manufacturer information; following those guidelines, it would be possible to supply the full array of subfields; however, for the BSR for Rare Books, use manufacturing information only when lacking parallel publishing information. For items with only one publisher but multiple places presented, catalogers should follow DCRM(B) 4B6.2. All indicators and subfields related to this field are available for use. \$a, \$b, \$c Required	M
300	Physical description \$a, \$c Required \$b, \$e Use if applicable	M
490	Series statement Transcribe here the form of the series statement as it appears on the prescribed source in the item.	A
5XX	Notes that are required by DCRM(B) in particular situations should be included in the BSR for Rare Books. A complete list of required notes is given in the index of DCRM(B).	A
500	Source of title proper	A
500	Note indicating the original position on the title page of transposed elements	A
501	With note	A
502	Dissertation note	A
533	Reproduction note	A
546	Language note Give the language(s) of the described materials if not apparent from the rest of the description. Also describe alphabets, script, or other symbol systems	A

BIBCO Standard Record Training Documentation

BSR Rare Books: Example Discussion

BIBCO Standard Record Training Documentation
November 9, 2011

1. There is other information in this book that could be put in 5XX notes: there are signatures in it; a date for the actual text, “April 18, 1776”; and other reference information also taken from outside the book. Why would any or all of these be included in the record?
2. The varying title in the 246 appears on the pages of the book. Would you use specific codes to indicate this? Why or why not?
3. Let’s assess the value of the 300 \$b port. This is not on the piece (refer to note on the library’s copy). Who would find this information important?
4. The letter referred to in the 700 field represents only a portion of the content. It is optional to include this added entry. What reason might a cataloger use to support inclusion of it in the BSR?
5. The 700 refers to the letter being sent to William Strahan, Esq. Would you provide an added entry for William Strahan? Why or why not?
Would you provide a 500 informal contents note explaining the relationship of this letter to the book being cataloged? Why or why not?

BIBCO Standard Record Training Documentation

C. Metadata Application Profile (MAP): BSR for Cartographic Materials

This MAP is defined for cartographic materials, including all materials that represent the whole or part of the Earth or any celestial body. These include two- and three-dimensional maps and plans (including maps of imaginary places); charts; atlases; globes; block diagrams; sections; aerial photographs with a cartographic purpose; bird's-eye views (map views); etc. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

Elements	Labels and notes
Leader: Code the following as specified	
06	Type of record “e” or “f”
07	Bibliographic level “m” or “c”
17	Encoding level “blank”
18	Descriptive cataloging form “a”
007: Variable Control Fields-Physical Description Fixed Field: Code the following positions for cartographic materials	
00	Category of material
01	Specific material designation
03	Color
04	Physical medium
05	Type of reproduction
06	Production/reproduction details
07	Positive/negative aspect
008 Variable Control Fields-Fixed Length Data Elements: Code at least the following positions	
06	Type of date/Publication status
07-10	Date 1
11-14	Date 2
15-17	Place of publication
18-21	Relief
22-23	Projection
25	Type of cartographic material
28	Government publication

D. Metadata Application Profile (MAP): BSR for Notated Music

This MAP is defined for published music. It also addresses manuscript or other unpublished music but not in detail. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

546 Principally English words; Pie Jesu in Latin.
650 0 Vocal duets with orchestra \$v Vocal scores with piano.
650 0 Musicals \$v Excerpts \$v Vocal scores with piano.
650 0 Olympics \$v Songs and music.

BSR Notated Music: Example 2 Discussion

1. Discuss the benefits of including a Formatted Contents Note with enhanced coding. What are the drawbacks? What is your local policy regarding Formatted Contents Notes for music scores?
2. Does the subject access point for Olympics—Songs and music add clarity or cause confusion? Is it appropriate for a BSR? Because the piece is not in hand, for the purposes of this discussion you should base your decision on the contents note.
3. The indicators used for the varying title in the 246 field are correct according to MARC 21. However, catalogers are allowed to use 246:1#: for varying titles in BSRs. How might the alternative use of these default 246 indicators affect the public display? Would user needs be affected?

BIBCO Standard Record Training Documentation
November 9, 2011

E. Metadata Application Profile (MAP): BSR for Sound Recordings

This MAP is defined for music and non-music sound recordings, including reproductions in physical forms. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

518 Recorded in February 1999 in Boulder, Co.

500 Program notes in English and in English translation of selected lyrics ([16] p.), inserted in container.

505 0 Greetings (7:38) -- Sunset (10:29) -- Anesigu (4:04) -- Griffin 2 (11:10) -- Nagrishad (7:04) -- Samai Husaini (6:41) -- A wish (9:03).

650 0 Music \$z Nubia.

650 0 Folk music \$z Nubia.

650 0 Songs, Arabic \$z Nubia.

650 0 Folk songs, Arabic \$z Nubia.

BSR Sound Recordings: Example 1 Discussion

1. All the positions in the 007 are coded.
When might this be appropriate to do? Who might need this information?
2. Use of the term “compact disc” for sound recordings is mandatory if applicable for BSR records.
What does this term add that the 300\$a information doesn’t address?
3. The cataloger chose to use the option of describing the accompanying brochure in a 500 note.
How does this information support user needs?
4. The 518 and related 033 contain textual information and coded information about the date and time of recording this live performance. These fields are not required in the BSR.
Would you add one or both of these fields? Why or why not?
5. Would you add 700 fields for any or all of the supporting musicians? Why or why not?

BSR Sound Recordings: Example 2

300	1 sound disc : \$b digital, stereo ; \$c 4 3/4 in.
500	Compact disc.
546	Chiefly in English, with some in French, Spanish, and Tagalog.
500	Includes words of some poems printed on container insert.
511 0	Recited by Loren Legarda, Antonio Mabesa, Cecilia Lazaro, Elizabeth Enriquez, Gerry Se, Jun Banaag, Lourdes Brillantes, Victor Avecilla.
505 0	Love -- Amour, tel qu'il est -- Cecilia, why not now? -- Pourquoi pas maintenant, Cecilia -- Tempest, borne the fleeting passion -- Dispossessed, for Melinda -- One summer lost -- Tag-araw ma'y lilipas din -- Saffron, doves, and a temple bell -- Pursued with passion -- Felice's lament -- Woman of the earth -- Advice to a bureaucrat -- By the grace of poems apolitical -- Spare us this day our daily bread -- Essence unspiritual, for Joy -- Terminus, for Agatha -- Dressing up for a funeral -- Epic poem, Bayang isinumpa = country of my birth -- Season's greetings to a stillborn child -- Seduction, death outwitted -- Seducción -- A definition of God -- Definición de Dios.

BSR Sound Recordings: Example 2 Discussion

1. What fixed field codes would you supply, given the fact that the BSR does not require all of the codes in this record? Why?
2. Assuming that little has been written about this poet, comment on the contents of the Formatted Contents Note. Regarding the decision to record the title of each poem in this record, would a different decision be made for a sound recording of poems by a very well-known poet?
3. Would you add a genre heading for the poetry content of this sound recording? Why or why not?
4. Would you add 700 fields for any or all of the people reading these poems? Why or why not?

F. Metadata Application Profile (MAP): BSR for Moving Image Materials

This MAP is defined for description of motion pictures and videorecordings of all kinds, including complete films and programs, compilations, trailers, newscasts and newsfilms, stock shots, and unedited material. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

700 1 Koster, Henry, \$d 1905-
830 0 Award winners (Universal City Studios)

BSR: Moving Image Materials: Example 1 Discussion

1. Only two of the five actors in the film credits are included in the 511 for cast and as added entries.
What judgment was used for this decision?
What institutional needs might provide local policy to include all cast members listed in the credits as added entries in a motion picture?
2. The videodisc container includes more information about the film characteristics:
“full frame,” “1.33:1.”
Would including these pieces of information in the record assist user needs?
3. The director of photography, film editor, and composer are given in the film credits but are not included in the record.
What circumstances would prompt a cataloger to include them in a 508 field and make added entries for them?
4. The container includes the statement that this is “From the Pulitzer winning play by Mary Chase.” She is also listed in credits as having written the screenplay. It is an option to include as an added entry.
When would cataloger judgment determine that an added entry for her be used in the record?

BSR Moving Image Materials: Example 2 Discussion

1. On the containers, the Corporation for Public Broadcasting & Annenberg Foundation is described to be a company which promotes and sponsors programming series for K-12 teachers. Including an added entry in a BSR for a corporate body associated with a videorecording is based on judgment and/or institutional policy. Would you include this corporate body in a 710 field? Why or why not?
2. Would it be helpful to put the running time for each disc in the contents note? Why or why not? What would be a deciding factor not to include the running time?

BIBCO Standard Record Training Documentation

G. Metadata Application Profile (MAP): BSR for Graphic Materials

This MAP is defined for graphic materials of all kinds, including opaque (two-dimensional art originals and reproductions, charts, photographs, and technical drawings or intended to be projected or viewed (e.g. filmstrips, radiographs, slides). Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

BSR Graphic Materials: Example 2 Discussion

1. There is the statement on the bottom of the poster verso, “ACM’s programmes January-April 2008.” Would a note about this assist user needs? Why or why not?

BIBCO Standard Record Training Documentation
November 9, 2011

2. The 520 refers to a specific Buddha statue in Bangladesh.
Would adding an additional subject heading to address the location of the statue be appropriate? If so, what type of added value would it provide users?
3. The 500 note refers to a list of activities of the Asian Civilisations Museum during a four-month period.
Would a subject heading for the Museum be useful? Why or why not?
4. The BSR for graphic materials requires only the first two positions of the 007 to be coded.
What reasons could support coding all the positions?

BIBCO Standard Record Training Documentation
November 9, 2011

H. Metadata Application Profile (MAP): BSR for Electronic Resources

This MAP is defined for electronic resource monographs whose access to the content is either direct or remote. Types of these electronic materials include: computer software (programs, games, and fonts), numeric data, computer-oriented multimedia, and online systems or services. Elements in the MAP are represented by fields, subfields, and codes from the MARC 21 Format for Bibliographic Data.

Elements are defined as being either mandatory (M) or mandatory if applicable (A). System-supplied elements (e.g., 001, 003, 005) are not included. Other elements not included in the MAP are not required for use in the BSR. However, they may be used if cataloger judgment and/or local institutional policy determine a need for them.

Use AACR2, LCRIs, standardized classification and subject heading systems, and MARC 21 for guidance.

Significant aspects

When the content of an electronic resource falls out of the categories listed above, determining the significant aspect of the content is important.

- If it is determined that the significant aspect of the content falls into another category defined in Leader 06 Type of record, code the Leader 06 for that significant aspect and code the 008 Form of item for that content.
- Add an 007 for the electronic resource; an 006 may be added for the electronic resource aspect.
- Add an 856 field for remote access electronic resources.
- For description use the appropriate MAP for the significant aspect along with elements in this MAP.
- Refer to AACR2 Chapter 9 and the chapter which covers description for the significant aspect, e.g., to describe maps on a CD-ROM, use Chapter 9 and Chapter 3.
- Use this MAP and the corresponding MAP for the significant aspect to learn what is mandatory and mandatory if applicable for PCC BSRs.

6XX	Subject, Genre and/or Form access fields Use judgment in assessing each item. As appropriate, assign a complement of headings that provides access to at least the primary/essential subject, genre, and/or form of the work at the appropriate level of specificity. Assign such headings from an established thesaurus, list, or subject heading system recognized by the MARC 21 Format for Bibliographic Data. Follow the conventions of the particular subject heading system being used.	A
700-751	Added entry fields Use judgment in assessing each item. Assign a complement of added entries that covers the significant relationships associated with the work, expression, or manifestation of which the item is a part. The inclusion and importance of added entries are intended to reflect individual cataloger’s judgment and/or local policy, in the context of shared cataloging.	A
8XX	Series added entry If local institutional cataloging policy is to trace a series, include in this field the authorized form of the series as established in the LC Name Authority File.	A
856	Remote access: \$u; do not include institution-specific URLs.	A

BSR Electronic Resources: Example 1 Discussion

1. The system requirements notes contain very specific information about graphics, sound, etc. What are the factors a cataloger would use to include or not include this type of information in the record?
2. How extensive should a summary note be? Should a summary note always be included? Why or why not?
3. Under what circumstances would the cataloger include an added entry for the publisher?

BSR Electronic Resources: Example 2 Discussion

1. 13 chapter titles are provided. Each title has text specific to cultural sites, Greek wars, or Greek customs. Each is less than 6 minutes in duration.
Would you add a contents note with chapter titles? Why or why not?
2. The credits list Vanessa Tovell as the writer and Jeremy Freeston as the art director.
Would you consider these to be important to include in a 508 note? If so, would you include added entries for them as well? Why or why not?

I. Metadata Application Profile (MAP): BSR Supplemental Requirements for Remote & Direct Access Electronic Monographic Resources

Introduction

The supplemental MAPs define a set of elements for direct and remote access monographic electronic resources (Leader/07 "m" or "c") and should be used in conjunction with the BSR MAPs for all formats except for computer files (Leader/06 "m"). For the latter use the BIBCO Standard Record (BSR) for Electronic Resources. The following MAPs specify elements for the electronic aspects of the resource being cataloged. All elements in the supplemental MAPs either replace, or are in addition to, the required elements outlined in the BSR for the most significant material type of the resource being cataloged. The Leader/06 should be coded for the most significant material type of the resource being cataloged, and the BSR for that material type should be applied for any elements not covered in the supplemental MAPs contained below.

Elements in the Supplemental MAPs are:

- not the complete set of elements for any of the electronic resources covered by this supplement. A cataloger should begin with the set of BSR elements for a resource in a particular format (Leader/06), and then replace or add any fields that appear in these Supplemental MAPs.
- represented by fields, subfields, and codes from [MARC 21 Format for Bibliographic Data](#). Codes for positions in the Leader are supplied.
- defined as being either mandatory (M) or mandatory if applicable (A).
- not included if system-supplied (e.g., 001, 003, 005).
- limited to those remote or direct electronic resources requiring special treatment. Cataloger's judgment and/or local institutional policy are valid reasons to use additional fields in a bibliographic record.

Supplemental MAP for Remote Access Electronic Resources

M=Mandatory A= Mandatory if applicable

Element	Labels and Notes	Use
006 Fixed-Length Data Elements – Additional Material Characteristics		
<u>00</u>	Form of Material BIBCO libraries cataloging in OCLC and other shared bibliographic databases must use MARC 21 control field 006 with the assigned value "m" when the MARC Leader/06 is set to any code other than "m"	M
007 Variable Control Fields – Physical Description Fixed Field		

BIBCO Standard Record Training Documentation
November 9, 2011

<u>00</u>	Category of Material “c” For materials other than online books and notated music, use an additional 007 field for other characteristics not specified in the first 007 field	M
<u>01</u>	Specific Material Designation “t”	M
008 Variable Control Fields – Fixed-Length Data Elements		
<u>23/29</u>	Form of Item “o”	M
Element	Labels and Notes	Use
Variable Data Fields		
<u>010</u>	Library of Congress Control Number Do not include physical format LCCN here; use 776 field instead	A
<u>020</u>	International Standard Book Number Use \$a for e-version ISBN; use \$z for physical format versions	A
<u>024</u>	Other Standard Identifier Use \$a for e-version identifiers; use \$z for physical format versions	A
<u>028</u>	Publisher Number Record any relevant publisher/plate issue numbers in \$a and \$b without special coding	A
<u>040</u>	Cataloging Source Use the MARC code for the original/transcribing cataloging agency creating the e-resource record in \$a. Do not retain the MARC code from the 040 \$a of the physical format source record	M
<u>245</u>	Title Statement \$h Use \$h [electronic resource] after \$a, \$n, or \$p (or \$f and \$g for archival collections)	M
<u>250</u>	Edition Statement Record only edition statements originating from the original publisher/society; ignore statements that pertain to specific provider versions	A
<u>260</u>	Publication, Distribution, etc. (Imprint) All online resources are considered published. Record first named publication information that applies to all known instances of the online resource. If the e-resource being cataloged is an online reproduction of a physical format monograph, usually the publisher/distributor information will come from the original physical format source record	M
<u>300</u>	Physical Description \$a Use 1 online resource in \$a (<i>if desired, add other indications of the extent in a parenthetical qualifier</i>)*	M

BIBCO Standard Record Training Documentation
November 9, 2011

<u>490</u>	Series Statement Transcribe the form of the series only if it applies to all known iterations of the resource. When the e-version is being used as the basis of the description and only one ISSN appears in the resource being described, record that ISSN in the 490 field. If both a print ISSN (p-ISSN) and an electronic ISSN (e-ISSN) appear in the resource being described, transcribe the e-ISSN. When the physical format version is being used as the basis of the description, use whatever ISSN appears on that record. If no ISSN appears in the existing record, do not add any ISSN to the 490 field	A
<u>500</u>	Source of Title Proper Note – see 588 field	A
<u>506</u>	Restrictions on Access Note Use only for records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects; use with \$5	A
<u>533</u>	Reproduction Note Use only for records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects; use with \$5	A
<u>538</u>	System Details Note — System Requirements Use for records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects; use with \$5. For all other records, make a System details note only if unusual software is needed to access/use the resource	A
<u>538</u>	System Details Note — Mode of Access Use for records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects; use with \$5. For all other records, make a Mode of access note only if the resource is accessed by means other than the World Wide Web	A
<u>583</u>	Action Note Use only for records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects; use with \$5	A
<u>588</u>	Source of Description Note/Source of Title Note If the description is based on a single online resource, use Source of description note combined with Source of title note <i>Example:</i> 588 \$a Description based on online resource; title from PDF title page (ACM, viewed May 26, 2011). If the description is based on part of a multipart resource, include that information in Source of description note <i>Example:</i> 588 \$a Description based on online resource, vol. 2; title from PDF title page (ACM, viewed May 26, 2011). If the description is based on a record for the physical format, use the following phrase without additional information: Description based on [physical format] version record <i>Examples:</i> 588 \$a Description based on print version record. 588 \$a Description based on CD-ROM version	
<u>700-751</u>	Added Entry Fields Use if applicable to all known instances of the online resource. Do not use for package/provider names (records for DLF Registry Masters	A

BIBCO Standard Record Training Documentation
November 9, 2011

	records, HathiTrust Digital Library, and other digital preservation projects excepted; use with \$5)	
<u>776</u>	Additional Physical Form Entry Required if the description is based on the record for another format; otherwise provide if readily available. Use 776 \$i rather than the 530 field to describe the type of resource recorded in the 776 field <u>Example:</u> 776 08 \$i Print version: \$a	A
<u>800-830</u>	Series Added Entry Fields Use the authorized form of the series for the physical format version. For series that exist only online, use the authorized form of the online series. Do not use for package/provider series (records for DLF Registry of Digital Masters, HathiTrust Digital Library, and other digital preservation projects excepted; use with \$5). Use the physical format ISSN rather than the online ISSN for series that exist in physical format as well as online. Append the \$x to the end of the field as the final subfield <u>Example:</u> 830 #0 \$a Proceedings of SPIE—the International Society for Optical Engineering ; \$v v. 7719. \$x 0277-786X	
<u>856</u>	Electronic Location and Access Use \$u for URLs that are general (not institution specific). Do not use \$z for information that is institution specific. If deemed necessary, include information about the package name and or format <u>Example:</u> 856 40 \$3 Education in video (streaming video) \$u [URL]	A

* 300 field: If giving indications of extent, provide terms according to the type of material of the resource:

For one or more files in a format that parallels a print, manuscript, or graphic counterpart (e.g., PDF), give an appropriate term in parentheses taken from subrule .5B of AACR2 chapters 2, 3, 5, or 8. For example: 1 online resource (1 score (vi, 27 p.)) : \$b ill.

For other types of files (e.g., audio files, video files), specify the number of files using an appropriate term in accord with AACR2 9.5B3. For example: 1 online resource (1 sound file); 1 online resource (2 video files).

Note: Audio and video files may be either streaming or downloadable. In a provider-neutral record, the transmission technology (e.g., “streaming”) should be omitted from the 300 field for physical description. When appropriate, the transmission technology may be specified in the respective field 856 subfield \$3. It may be combined with the package name, e.g., 856 40 \$3 Education in video (streaming video) \$u http://...

J. Metadata Application Profile (MAP): BSR for Archival Collections

BIBCO Standard Record Training Documentation

November 9, 2011

Introduction

This document defines a set of required elements for bibliographic records for archival collections, including one-item collections. BIBCO Standard Record (BSR) for Archival Collections can be recognized by the presence of either encoding level “blank” or encoding level “1,” indicating a standard level record, the presence of “pcc” in field 042 to indicate that the record was created by a BIBCO library, and the presence of “dacs” in subfield \$e of field 040 to indicate the use of Describing Archives: A Content Standard (DACS) as a descriptive convention. Other non-PCC libraries can use this standard without the 042 field as an aid in their cataloging. The BIBCO Standard Record for Rare Books was used as starting point in the development of the BSR for Archival Collections. In fact, relevant material in the Final Report of the Task Group on BIBCO Standard Record for Rare Book has been lifted and used in this report as well.

Characteristics of the BIBCO Standard Record for Archival Collections

1. The BSR for Archival Collections is a “floor” record that promotes an essential set of elements to serve user needs while fulfilling the functional objectives of DACS. The “Single-level Optimum” level of description outlined in DACS Chapter 1 was used as a base in developing the BSR for Archival Collections. The BSR emphasizes essential descriptive data as well as controlled name and subject access points.
2. The two encoding levels used in the BSR for Archival Collections allow the creation of bibliographic records for Archival Collections that are examined (EncLvl blank), and Archival Collections that are cataloged based on an extant description (EncLvl 1); the use of two encoding levels meets the needs of all BIBCO stakeholders working with manuscript materials.
3. The BSR element set combines use of required elements. It avoids requiring unessential or redundant elements and includes only those essential elements that support user tasks to find, identify, select, and obtain needed resources.
4. BIBCO Standard Records are considered to be as full as is necessary for user tasks. For archival materials in particular, the uniqueness of resources is represented by adding elements that are mandatory if applicable for the material in hand. In addition, elements not included in the essential element set may be added if determined to be important for access by cataloger’s judgment, local policy, and/or consortial agreements.
5. Main entry headings (1XX) and appropriate added entries (7XX) are supported by authority records identified in the LC/NACO Authority File, and must be established through the NACO Program, if not found. Subject headings (6XX) may be taken from Library of Congress Subject Headings (LCSH). Subject terms

BIBCO Standard Record Training Documentation
November 9, 2011

that are not identified in LCSH may be established, according to cataloger's judgment.

6. The BSR for Archival Collections is supported through use of the MARC 21 Format for Bibliographic Data.
7. Using the defined element set in the BSR for Archival Collections will enhance the consistency for more uniform data in bibliographic records, and will allow catalogers to concentrate on appropriate added access.
8. The BSR for Archival Collections is intended for use by experienced catalogers knowledgeable in DACS, AACR2, the LCRIs, subject systems, and structured vocabularies that can be used to improve access to information.

This MAP is defined for archival collections. Elements in the MAP are:

- represented by fields, subfields, and codes from [MARC 21 Format for Bibliographic Data](#). Codes for positions in the Leader are supplied.
- defined as being either mandatory (M) or mandatory if applicable (A).
- not included if system-supplied (e.g., 001, 003, 005).
- limited to those required for use in the BSR. Cataloger's judgment and/or local institutional policy are valid reasons to use additional fields in a bibliographic record.

Element	Labels and Notes	Use
<u>Leader</u>		
<u>06</u>	Type of record “p” or “t”	M
<u>07</u>	Bibliographic level “c,” “d,” or “m”	M
<u>08</u>	Type of control “a”	M
<u>17</u>	Encoding level “blank” or “1”	M

BIBCO Standard Record Training Documentation
November 9, 2011

Element	Labels and Notes	Use
18	Descriptive cataloging form “a”	M
007 Variable Control Fields – Physical Description Fixed Field		
00	Category of material	M ^{Microforms}
01	Specific material designation	M ^{Microforms}
04	Dimensions	M ^{Microforms}
05	Reduction ratio range	M ^{Microforms}
008 Variable Control Fields – Fixed-Length Data Elements		
06	Type of date/Publication status	M
07-10	Date 1	M
11-14	Date 2	A
15-17	Place of publication, production, or execution	M
35-37	Language	M
38	Modified record	M
39	Cataloging source “c” or “blank”	M

544	Location of Other Archival Materials Note	A
545	Biographical or Historical Data	A
546	Language Note Use judgment and add for complex language situations or for situations involving unusual scripts, where the 008 35-37 element alone cannot convey the information.	A
555	Cumulative Index/Finding Aids Note Use for analog indexes, finding aids, and online indexes, with \$u as appropriate. Some archival repositories may prefer to use the 856 field (Electronic Location and Access) in place of the 555.	A
561	Ownership and Custodial History	A

BIBCO Standard Record Training Documentation
November 9, 2011

Element	Labels and Notes	Use
6XX	Subject Access Fields Use judgment in assessing each item. Addition of genre/form terms (655), occupational terms (656), or functional terms (657) to the BSR for Archival Collections is encouraged if local policy calls for the use of such terms, as appropriate to the collection being described. Assign a complement of headings that provides access to at least the primary/essential subject, genre, and/or form of the collection at an appropriate level of specificity. Assign such headings from an established thesaurus, list, or subject heading system recognized by MARC 21 Format for Bibliographic Data. Follow the conventions of the particular subject heading system being used.	A
700-751	Added Entry Fields Use judgment in assessing each item and assign a complement of added entries that cover the primary relationships associated with the collection. The inclusion and importance of added entries are intended to reflect individual cataloger's judgment and/or local institutional policy.	A
852	Location	A
856	Electronic Location and Access Use for online indexes or finding aids; for analog indexes or finding aids, use the 555 field.	A
