Foreword to the First Edition

The Basic Serials Cataloging Workshop was the first course developed by the Serials Cataloging Cooperative Training Program, a program inaugurated in 1998 under the auspices of the CONSER Program. Since its release in 1999, the workshop has been given in numerous venues throughout the United States and has been translated into Spanish, French, and Chinese for workshops presented in Mexico, Canada, and Taiwan. The success of this course has led to the development of other workshops and today, in 2002, there are four courses with a fifth under development. SCCTP has also been hailed as a “best practice” for continuing education of librarians.

The enthusiasm and commitment of so many to this program attests to the great need for training in the area of serials cataloging. I am very grateful to the members of the SCCTP Steering Committee, to those who have helped fund the Program: NASIG, AMIGOS, SOLINET, and PALINET, and most particularly to Cameron Campbell for his expertise and hard work in developing this very thorough course in basic serials cataloging. Thanks are also extended to the many SCCTP trainers who have brought their experience and talents to presenting this course.

Over the years since its development, the course has been revised several times. The 2002 revision reflects the 2002 revision of AACR2. In addition to revising the content, the format of the course has been revised to reflect the use of PowerPoint as the basis for the trainee and instructor manuals and distribution in PDF format. Course contents have also been expanded in some cases based on suggestions from experienced trainers. I want to thank Les Hawkins, Ann Ercelawn, Steve Shadle, and Valerie Bross for their very useful comments and suggestions.

Further course materials may be developed based on demand as expressed on the evaluation sheet in Appendix I. It is hoped that SCCTP will branch out into distance learning, mentoring, and other forms of learning as the program matures.

This workshop was designed to be given by SCCTP trained-trainers; however, anyone familiar with serials cataloging can use the materials to provide training for others. They can also be used for self-study. Comments on the materials are most welcome.

Preface

The materials in this manual are organized into nine sessions; all but session one have exercises. Some sessions are optional and portions of others are optional. Any given workshop may include all the topics or only a portion of them. Even if some material is not used in the workshop you attend, the material may prove useful reading at a later time.

Each session may start with a brief warm up exercise and will conclude with a summary of the major points presented and references to relevant CONSER documentation. Exercises have also been provided for sessions two through nine to reinforce the major points covered in the preceding material.

At the end of each workshop we ask that you fill out a brief evaluation form. This will be most helpful in refining and re-working the training materials as well as their presentation. Your help in this is appreciated.

Table of Contents

Foreword

Preface

Session 1: Introduction

Session 2: What is a Serial?

Session 2: Exercises

Session 3: Original Cataloging

Session 3: Exercises

Session 4: Original Cataloging: What Next?

Session 4: Exercises

Session 5: Working with Copy: Finding Appropriate Copy

Session 5: Exercises

Session 6: Working with Copy: What to Edit

Session 6: Exercises

Session 7: When Do I Need a New Record?

Session 7: Exercises

Appendix A: Tools for Serials Catalogers

Appendix B: Acronyms and Initialisms Relating to Serials

Appendix C: Glossary of Serials Terms

Appendix D: MARC Workforms

Appendix E: Pre-Workshop Exercises

Appendix F: Answers to Exercises

Appendix G: MARC Tagging and Serials

Appendix H: CONSER Standard Record Cheat Sheet

Appendix I: Evaluation Form
