

Session 3: Original Cataloging

- How are fixed fields coded for serials?
- What is the chief source for a serial?
- How do I determine the main entry for serials?
- What title information should be included in the record?

1

Background information: CONSER Standard Record

- CONSER Standard Record Documentation and LC Rule Interpretations:
 - <http://www.loc.gov/catdir/cpsd/conser.html>
- Background:
 - <http://www.loc.gov/acq/conser/access-level.html>

2

Philosophy behind the CONSER Standard Record

- Meet user tasks for access
- Reduce redundancies in cataloging
- Help with decision-making process
- Work for better utilization of MARC 21 for storage, retrieval and display

3

“CSR” and “AACR2”: Two Practice Labels

- CONSER standard record cataloging is an application of AACR2 cataloging
- Examples labeled “CSR” show CONSER standard record application of AACR2
- Examples labeled “AACR2” show elements beyond the requirements of “CSR”

Summary

- Base the description on the first or earliest available issue in hand
- The chief source is the title page or its substitute (cover, caption, etc.)
- Most serials are entered under title
- Uniform titles are sometimes used to distinguish different serials with the same title (entered under title)
- Record the title proper as it appears on the chief source, except for capitalization, punctuation and omissions
- Record other title information when considered useful
- There are important differences between the CONSER standard record and AACR2 practice
