

Appendix A: Tools for Serials Catalogers

A. Print resources for cataloging serials:

1. **Anglo-American Cataloguing Rules (AACR2)**. 2nd ed. rev. Chicago: American Library Association., 1988-
2. **CONSER Cataloging Manual (CCM)**. 2002 ed. Washington, D.C.: Serial Record Division, Library of Congress; distributed by the Cataloging Distribution Service. An in-depth presentation of serials cataloging as practiced at LC and CONSER institutions that features the step-by-step process of cataloging a serial with reference to pertinent AACR2 rules and LC rule interpretations and explanations of LC oral tradition relating to serials.
3. **CONSER Editing Guide (CEG)**. 1994 ed. Washington, D.C.: Serial Record Division, Library of Congress; distributed by the Cataloging Distribution Service. This guide supplies instructions for online input for serials catalogers following AACR2 in a MARC-based system.
4. **CONSER Standard Record documentation:**
<http://www.loc.gov/catdir/cpsd/conser.html>
5. **Descriptive Cataloging Manual (DCM)**. The DCM is an in-house manual containing the procedures followed by catalogers at the Library of Congress. The chapters that relate to establishing name and series authority records, however, are used by CONSER members, NACO participants, and others participating in cooperative programs.
6. **Library of Congress Rule Interpretations (LCRIs)**. Washington, D.C.: Cataloging Distribution Service, Library of Congress.
7. Geer, Beverley and Caraway, Beatrice L. **Notes for Serials Cataloging**. 2nd ed. Englewood, Colo.: Libraries Unlimited, 1998.

Appendix B: Acronyms and Initialisms Relating to Serials

CONSER	Cooperative Online Serials Program. Formerly Conversion of Serials Project.
CSR	CONSER Standard Record
DCM	Descriptive Cataloging Manual. The Library of Congress in-house cataloging manual also used by members of national cooperative programs such as NACO.
FRBR	Functional Requirements for Bibliographic Records. An entity-attribute model meant to serve as a framework for examining elements of the bibliographic record and how they can be used to best create catalogs.
ISBD(CR)	International Standard Bibliographic Data—Serials and Other Continuing Resources. The ISBD(CR) is an international cataloging code of the description of continuing resources. It is developed and maintained by the International Federation of Library Associations (IFLA). It replaces ISBD(S).
ISSN	International Standard Serial Number. The ISSN is governed by the International Centre in Paris and assigned by centers in each country.
ISSN Canada	International Standard Serial Number Canada. The Canadian center responsible for assigning ISSN to Canadian imprints and located at the National Library of Canada.
LCSH	Library of Congress Subject Headings.
MAP	Metadata Application Profile
MARBI	ALA RTSD LITA RASD Committee on Representation in Machine Readable Form of Bibliographic Information.
MARC 21	Machine Readable Cataloging. Formerly USMARC
NACO	Name Authority Cooperative.
NASIG	North American Serials Interest Group, Inc.
NISO	Name Information Standards Organization. NISO began as Committee Z39 of the American National Standards Institute (ANSI).

NSDP	National Serials Data Program. NSDP is a section of the Serial Record Division, Library of Congress and is the United States center responsible for assigning ISSN to U.S. imprints.
OCLC	Online Computer Library Center.
PCC	Program for Cooperative Cataloging. CONSER is a bibliographic component along with BIBCO. NACO and SACO are authority components
RLIN	Research Libraries Information Network. The cataloging database of the Research Libraries Group (RLG).
SCCTP	Serials Cataloging Cooperative Training Program.
SICI	Serial Item and Contribution Identifier. The bar code that uniquely identifies each issue of a serial, of which the ISSN forms the first portion.
SISAC	Serials Industry Standards Advisory Committee. SISAC is a committee of the Book Industry Study Group, Inc. (BISG).
USNP	United States Newspaper Program.

Appendix C: Glossary of Serials Terms

Definitions are taken from AACR2 and/or the CONSER Cataloging Manual where possible.

Access point	A name, word, code, etc., under which a publication may be searched and identified in a catalog.
Added entry	An entry, additional to the main entry, by which an item is represented in a catalog; a secondary entry.
Added title page	A title page preceding or following the title page chosen as the basis for the description of the item. It may be more general (e.g., a series title page), or equally general (e.g., a title page in another language).
Alternative numbers	A secondary system of numbering (e.g., vol. 1, no. 1 + No. 1)
Alternative title	The second part of a title proper that consists of two parts, each of which is a title; the parts are joined by "or", or its equivalent in another language.
Analytic	A catalog entry for a part of a publication for which a comprehensive entry is made. An analytic can be a title within a series, a chapter or article within a book, a series published within a larger series, etc. An analytic record can be either a monograph or a serial.
Analytical title page	The title page of an individual work in a series.
Area	A major section of the bibliographic description, comprising data of a particular category or set of categories.
Backfile	Purchase of specific volumes or issues that are lacking from the collection. They are considered "only orders" because they are single, one-time purchases.
Bibliographic resource	An expression or manifestation of a work or an item that forms the basis for bibliographic description.
Body of the entry	Areas 1-6 of the catalog record (i.e., the title statement through the series).

Caption title	A title given at the beginning of the first page of text.
Chief source of information	The source of bibliographic data to be given preference as the source from which a bibliographic description (or portion thereof) is prepared. For serials, the chief source is the title page or title page substitute of the first or earliest issue.
Chronological designation	A date, or combination of dates, numbers, or words that identifies an issue of a serial within a chronological sequence.
Chronological relationship	The relationship in time between bibliographic items (e.g., the relation of a serial to its predecessors and successors).
Claiming	The process of contacting a publisher or vendor to request supply of material missed or overdue on subscription, standing order, or backfile order.
Colophon	A statement at the end of an item giving information about one or more of the following: the title, author(s), publisher, printer, date of publication or printing. It may include other information.
Common title	A title common to two or more works, one or more of which carries the title and/or designation of a section.
Computer file	See Electronic resource.
CONSER standard record	A record that contains those bibliographic data elements identified by CONSER as essential in supporting users' efforts to find, identify, select, and obtain serial resources. These include a defined set of descriptive elements, authorized access points, and subject headings. An authenticated CONSER standard record is identified by having the encoding level "blank", a valid LCCN, and an authentication code of "lc" or "lcd."
Continuing resource	A bibliographic resource that has no predetermined conclusion.

Corporate body	An organization or group of persons that is identified by a particular name and that acts, or may act, as an entity. Typical examples of corporate bodies are associations, institutions, business firms, nonprofit enterprises, governments, government agencies and the like.
Cover date	A chronological designation that reflects the date of issuance rather than the coverage, such as the date found on the cover of magazines and periodicals.
Cover title	A title printed on the cover of an item as issued.
Coverage date	A date that reflects the coverage of the contents of the item.
Cumulation	An issue of a serial that collects all of the information given in the previous issues for a given period and is intended to replace those issues. The cumulation may rearrange, correct, or expand the contents of the original issues.
Data element	A component part of a MARC record such as a fixed or variable field.
Designation	The numeric or chronological designation or combination of both as recorded in field 362 or 500. See also Numbering.
Direct access (Electronic resources)	The use of electronic resources via carriers (e.g., disks, cassettes, and cartridges) designed to be inserted into a computer or its auxiliary equipment by the user.
Distinctive title	A title that appears in addition to the title proper, is unique to an issue, and is often related to the topic or theme of that issue.
Editorial pages	These pages are most often found in periodicals and usually contain the masthead in a boxed area. The title may be found at the head of the page.
Electronic resource	Material (date and/or program(s)) encoded for manipulation by a computerized device. This material may require the use of a peripheral directly connected to a computerized device (e.g., a CD-ROM drive) or a connection to a computer network (e.g., the Internet).

Electronic serial	A continuing resource published periodically in electronic format and distributed via computer networks or CD-ROMs, etc.
Enumeration	The scheme used by a serial publication to identify distinct issues within a numerical sequence. Common enumeration elements are: volume/no. and month/year.
Fill character	A special character used by a cataloger to indicate no attempt to set a value for a fixed field element has been made.
Fluctuating title	A title that changes back and forth on a regular or irregular basis.
Format	In its widest sense, a particular physical presentation of an item.
Heading	A name, word, or phrase placed at the head of a catalog entry to provide an access point.
Holdings	The specific issues of a serial title which a library owns.
Holdings Statement	A formalized note in a library catalog or system that summarizes the library's holdings of a serial title.
Home page	The hypertext document that serves as the "preface" for a service or publication mounted on the World Wide Web. It is normally an introductory screen that provides general information about the institution maintaining the site, or a publication or group of publications available. Hypertext links are included to access specific documents or files archived at the site.
Integrating resource	A bibliographic resource that is added to or changed by means of updates that do not remain discrete and are integrated into the whole. An integrating resource may be finite or continuing. Examples of integrating resources include updating loose-leafs and updating Web sites.
Internal numbers	Numbers within a volume that repeat with each volume (e.g., vol. 3, no. 2)
Issuing body	A corporate body that is responsible for the issuance, and often the contents, of an item but whose primary function is not that of publishing.

Item	A physical volume bound and shelved as a unit. Items can be a single publication or a group of serial issues bound together. Items carry a bar code to identify the piece for various inventory purposes.
Item record	An inventory record created for each physical volume in the Library's collection which is used by the circulation system to track circulation status, loan period, housing location, etc.
Main entry	The complete catalog record of an item, presented in the form by which the entity is to be uniformly identified and cited. The main entry may include the tracing(s).
Masthead	The masthead is the statement of title, ownership, editors, etc. It is most frequently found in periodicals and newsletters and generally appears on the editorial or contents page. In many cases the ISSN also appears with the title on the masthead.
Metadata	A set of data that describes and gives information about other data (OED online, draft revision Dec. 2007)
Metadata Application Profile (MAP)	• Rachel Heery (UKOLN): "Application profiles consist of data elements drawn from one or more namespace schemas combined together by implementers and optimized for a particular local application." • DCMI: "A set of metadata elements, policies, and guidelines defined for a particular application. The elements may be from one or more element sets, thus allowing a given application to meet its functional requirements by using metadata from several element sets including locally defined sets. [...]" From: Canadian Metadata Forum. Workshop B: Application Profiles. http://www.collectionscanada.gc.ca/obj/014005/f2/014005-05209-g-e.pdf
Monograph	A bibliographic resource that is complete in one part or is intended to be completed in a finite number of separate parts.

Multimedia item	An item containing two or more categories of material, no one of which is identifiable as the predominant constituent of the item.
Multipart item	A monograph complete, or intended to be completed, in a finite number of separate parts. The separate parts may or may not be numbered.
Newspaper	A serial publication that contains news on current events of special or general interest. The individual parts are listed chronologically or numerically and appear usually at least once a week. Newspapers usually have a masthead rather than a cover and are normally larger than A3 (297 mm x 420 mm.) in size.
Numbering	The identification of each of the successive items of a publication. It can include a numeral, a letter, any other character, or the combination of these with or without an accompanying word (volume, number, etc.) and/or a chronological designation.
Numeric designation	A number or combination of numbers, dates, letters, or words that identifies an issue of a serial within a numeric sequence.
Other title information	A title borne by an item other than the title proper or parallel or series title(s) including subtitles.
Parallel title	The title proper in another language and/or script.
Periodical	A serial published more frequently than annually. Each issue normally contains separate articles, stories or other writings.
Physical carrier	A physical medium in which data, sound, images, etc., are stored. For certain categories of material, the physical carrier consists of a storage medium (e.g., tape, film).
Predominant name	The name or form of name of a person or corporate body that appears most frequently (1) in the person's works or works issued by the corporate body, or (2) in reference sources, in that order of preference.
Qualifier	A parenthetical word or phrase added to a corporate body heading or uniform title to distinguish the body or title from others with the same name or title.

Reciprocal relationship	The relationship between two items, as represented by paired linking fields (e.g., 780/785) or by a link with the same tag that is given in each related record (e.g., 775).
RECON	Retrospective conversion of manual cataloging records to machine readable format.
Remote access (Electronic resources)	The use of electronic resources via input/output devices connected electronically to a computer.
Reprint	1. A new printing of an item made from the original type image, commonly by photographic methods. The reprint may reproduce the original exactly (an impression) or it may contain minor but well defined variations (an issue). 2. A new edition with substantially unchanged text.
Retrospective conversion	The process of converting bibliographic records on catalog cards into machine readable form to provide access through the online catalog.
Running title	A title or abbreviated title that is repeated at the head or foot of each page or leaf.
Section	A separately published part of a bibliographic resource, usually representing a particular subject category within the larger serial and identified by a designation that may be a topic, or an alphabetic or numeric designation, or a combination of these.
Serial	A continuing resource issued in a succession of discrete parts, usually bearing numbering that has no predetermined conclusion. Examples of serials include journals, magazines, electronic journals, continuing directories, annual reports, newspapers, and monographic series.
Series	1. A group of separate items related to one another by the fact that each item bears, in addition to its own title proper, a collective title applying to the group as a whole. The individual items may or may not be numbered. 2. Each of two or more volumes

Series title page	An added title page bearing the series title proper and usually, though not necessarily, other information about the series (e.g., statement of responsibility, numeric designation, data relating to publication, title of the item within the series).
Spine title	A title appearing on the spine of an item.
Standing order	An order on which all volumes of a series are automatically received.
Statement of responsibility	A statement transcribed from the item being described, relating to persons responsible for the intellectual or artistic content of the item, to corporate bodies from which the content emanates, or to persons or corporate bodies responsible for the performance of the content of the item.
Subseries	A series within a series (i.e., a series that always appears in conjunction with another, usually more comprehensive, series of which it forms a section). Its title may or may not be dependent on the title of the main series.
Successive entry	The convention of creating a new record for a serial each time a major change occurs.
Supplement	An item, usually issued separately, that complements one already published by bringing up-to-date or otherwise continuing the original or by containing a special feature not included in the original. The supplement has a formal relationship with the original as expressed by common authorship, a common title or subtitle, and/or a stated intention to continue or supplement the original.
Supplied title	A title provided by the cataloger for an item that has no title proper on the chief source of information or its substitute. It may be taken from elsewhere in the item itself or from a reference source or it may be composed by the cataloger.
Title	A word, phrase, character, or group of characters, normally appearing in an item, that names the item or the work contained in it.
Title page	A page at the beginning of an item bearing the title proper and usually, though not necessarily, the statement of responsibility and the data relating to publication.

Title page substitutes	When a serial does not have a true title page, another page may substitute. AACR2 12.02B provides the order of preference for title page substitutes: analytical title page (for a serial issued as part of a series); cover, caption; masthead; editorial pages; colophon; other pages.
Title proper	The chief name of an item, including any alternative title but excluding parallel titles and other title information.
Title screen (Electronic resources)	In the case of a computer file, a display of data that includes the title proper and usually, though not necessarily, the statement of responsibility and the data relating to publication.
Updating loose-leaf	An integrating resource that consists of one or more base volumes updated by separate pages that are inserted, removed, and/or substituted.
Uniform title	1. The particular title by which a work is to be identified for cataloguing purposes. 2. The particular title used to distinguish the heading for a work from the heading for a different work. 3. A conventional collective title used to collocate publications of an author, composer, or a corporate body containing several works or extracts, etc., from several works (e.g., complete works, several works in a particular literary or musical form.
URL	Uniform Resource Locator. Location information of an electronic resource expressed in a standardized format, which allows for computer files to be sent and received automatically. The World Wide Web uses the URL as the basis of linking to other files and documents around the Internet.
Verso	1. The left-hand page of a book, usually bearing even page numbers. 2. The side of a printed sheet intended to be read second.
Volume title page	A page that contains the title and designation for an entire volume, rather than the designation for a specific issue. Volume title pages are often issued separately once the volume is complete.

Whole numbers

Continuous numbers that do not repeat. In addition to numbered serials, the term "whole numbers" is also used for alternative numbering schemes.

Appendix E: Pre-Workshop Exercises

Please print out the following exercises and complete as many of as you can. The purpose of these exercises is to help you determine what areas of serials cataloging you may want to pay particular attention to during the workshop.

Bring the completed exercises and any questions you may have with you to the workshop to facilitate discussion about the examples during the scheduled sessions.

Please also note that bibliographic information used in these exercises may have been altered to illustrate various points of serials cataloging practice.

Part A: Is It a Serial?

Give as many reasons as you think applicable in each case below.

Example 1:

Cover:	Today's Education The Journal of the National Education Association
Contents page:	The Annual of the National Education Association 1982-83 Volume 71, Number 3
	Today's Education
Verso of contents page:	Published once a year by ... (ISSN) 0271-3573

Is this a serial? Circle one: **Yes** No

1. It has enumeration/chronology.
2. It bears an ISSN.
3. The publisher's statement of frequency indicates intent to continue indefinitely.

Example 2:

It is known that the following is issued annually.

CD-ROM label:	Who's Who in Canadian Business 17th Edition 1997 ISSN 1209-8299
---------------	--

Is this a serial? Circle one: **Yes** No

1. It bears an ISSN.
2. Editions appear frequently.

Example 3:

First issue title page:	Proceedings of the Twelfth Annual Symposium on Computational Geometry
Second issue title page:	Proceedings of the Thirteenth Annual Symposium on Computational Geometry

Is this a serial? Circle one: **Yes** No

1. Words such as "Annual" indicate this is an ongoing conference.
2. Terms like "12th" and "13th" serves as numbering.

Example 4:

Is this a serial? Circle one: **Yes** No

1. Title words such as "Trends in ..." and "Progress in ..." are usually interpreted to indicate intent to publish indefinitely.
2. It has enumeration and chronology.

Example 5:

It is known that the 3rd edition was published in 1989, the 4th edition in 1992, and the 5th edition in 1998.

Is this a serial? Circle one: Yes **No**

This title would not usually be cataloged as a serial since the editions are so infrequent.

Example 6:

title page:	Expenditures on Children by Families 1997 Annual Report UNITED STATES DEPARTMENT OF AGRICULTURE Miscellaneous Publication Number 1528-1997
-------------	---

Is this a serial? Circle one: **Yes** No

1. The title is issued annually and the date is a year of coverage.

Trainers: note that the series could also be cataloged as a serial with this title as a serial analytic.

Part B: Is A New Record Required?

Example 1:

Title 1:	Marriage and divorce statistics
New issue:	Marriage, divorce and adoption statistics

Would you create a new record? Circle one: **Yes** No

There is a change within the first five words of the title.

Example 2:

Title 1:	Organic chemistry
New issue:	Organic chemistry review

Would you create a new record? Circle one: Yes **No**

The addition of a word indicating the type of resource is considered to be a minor change.

Example 3:

Title 1:	Annual report of the President's Commission on Children for 2002
New issue:	President's Commission on Children annual report 2003

Would you create a new record? Circle on: Yes **No**

The rearrangement of the corporate body from end of title to beginning is a minor change.

Example 4:

Title 1:	Doing Business in the Czech and Slovak Republics
New issue:	Doing Business in the Czech Republic

Would you create a new record? Circle one: **Yes** No

There is no change within the first five words but the scope of the publication has changed significantly.

Example 5:

Title 1:	STATISTIQUES ÉPIDÉMIOLOGIQUES ET DÉMOGRAPHIQUES ANNUELLES
----------	--

New issue:	ANNUAL EPIDEMIOLOGICAL AND VITAL STATISTICS
	ANNUAL EPIDEMIOLOGICAL AND VITAL STATISTICS
	STATISTIQUES ÉPIDÉMIOLOGIQUES ET DÉMOGRAPHIQUES ANNUELLES

Would you create a new record? Circle one: Yes **No**

There is no need for a new record since it is only the order of the parallel titles that has changed. A 500 note would typically be added to account for this.

Example 6:

Title 1:	Architectural Review Volume 17, April 1910
New issue:	Architectural Review New Series, Volume 1, January 1912

Would you create a new record? Circle one: Yes **No**

Although the enumeration has started over from volume one, there is no change in the title. The designation includes the phrase "new series" which will be included in the 362 field when edited to reflect this change.

Example 7:

Title 1 record:	130 Historian (Kingston, R.I.) 245 The Historian. 022 ISSN 0018-2370
New issue:	The Historian ISSN 0018-2370 Now published: Allentown, PA

Would you create a new record? Circle one: Yes **No**

There is no need for a new record since it is the place of publication that has changed. This would be noted in a 500 field and the fixed field place of publication code would be updated.

Part C: Closing Out and Linking Records

WELCOME TO THE HISPANIC CULTURE REVIEW

We are happy to present the Web edition of our three latest issues of the Hispanic Culture Review, a review published one or two times a year by students of George Mason University. Its many issues have introduced essays, fiction and poetry written in English or Spanish focusing on topics related to the Hispanic world. We hope that you will enjoy our on-line issues and we are looking forward to your correspondence.

Appendix F: Answers to Exercises

Session 2: Exercises

Give as many reasons as you can (there may be more than one per example) why the following titles should or should not be cataloged as serials.

Example 1

Cover: Volume 10, Number 1 | Winter 1999

Adobe Magazine

Publishing, Design, and Digital Media

Page 3: Adobe Magazine (ISSN 1081-4477) is published four times a year in January, April, July, and October ...

1. ISSN
2. Enumeration and chronology
3. Statement of frequency indicates a continuing publication
4. The word "magazine."

Example 2

First page: **World Stock Exchange Fact Book**

Cover: **World Stock Exchange Fact Book
1997**

Verso page 1: *The World Stock Exchange Fact Book* is published annually in one volume.
ISBN 0-9648930-1-0
ISSN 1087-500X

1. ISSN
2. There is a coverage date on the cover, 1997
3. There is a stated frequency.

Example 3

It is known that this title is issued every two years.

First page: ISSN 1058-1626

SERVICE INDUSTRIES USA

Third Edition

1. ISSN
2. 3rd ed. can serve as enumeration since we know it is issued frequently.

Example 4

Issue 1 title page:

Issue 2 title page:

Issue 3 title page:

Academic Freedom

Vol. t.p.:

**The Frank C. Brown Collection of
North Carolina
Folklore**
IN FIVE VOLUMES

Durham, North Carolina
Duke University Press

This is a multi-part item complete in five volumes and not a serial.

Example 7

This is a publication of limited duration that has a stated frequency and numbering and can be treated as a serial according to 12.0A.

Example 8

First page:

**PROCEEDINGS OF

Urban
Affairs
Annual
Review
43

This is a monograph appearing in the numbered series: Urban Affairs Annual Review. It could be cataloged either as a serial under the series title or as a monograph with a series tracing.

Session 3: Exercises

Use the workforms provided in Appendix D to record the cataloging data from the information provided in the following pages.

1. Select the chief source;
2. transcribe and tag the title proper;
3. select and tag a main entry, if any;
4. make any title added entries thought useful;
5. and, indicate any other title related notes thought appropriate.

Session 6: Exercises

Part A

Compare the bibliographic information to data on the issues received. Modify copy following the CONSER Standard Record guidelines.

Part B

Compare the bibliographic information about the issue in hand given in the following pages with the copy provided and indicate any editing necessary. The copy may not include all MARC tags.

Part C

Edit the copy provided to indicate cessations.

Part A

1. Exercise 1

Answer: This is a cessation

FF: Freq ■
 Regl ■ DtSt d Dates 1970, 1980

362 1 \$a Began with August/September 1970; ceased with March 1980.

1. The Encoding level can be changed to I (or blank if CONSER library) from "7" (Minimal level).
2. Note that that publishing statement has the abbreviated form: The Museum which is now not used. This does not need to be changed, unless you wish to do so to provide better access through the 260 field.
3. The physical description could be completed, although this is not critical. (The 300 field is not needed for CONSER Standard Record maintenance anyway.)
4. Subject headings should be added to the record.
5. The earlier title link should be checked against your catalog to see if you hold the title and if so, whether the form of the linking entry matches.

Session 7: Exercises

In part A, participants should indicate whether the situation calls for a new record or not and indicate their reasons. The emphasis in this section is simply on recognizing when a new record is required.

In part B, participants should complete the abbreviated workforms to indicate the tagging and coding of the relevant bibliographic data. The emphasis in this section is on closing out the old record and tagging and coding the bibliographic data in the new record.

Part A

Indicate whether the following situations require a new record or not. Also give a brief reason for your decision.

Session 8: Exercises

Part A. What is an electronic serial?

Example 1. This is a serial because:

1. Enumeration and chronology appear on the home page and link to the current issue.
2. The March/April issue is available so there are clearly designated issues.

Example 2.

This is not a serial since there are no designated issues. There is only a date of update. This is an integrating resource, despite the fact that it calls itself a journal and a magazine.

Appendix G: MARC TAGGING AND SERIALS

This appendix consists of two parts:

- Part A. Commonly-used serial tags
- Part B. Coding needed to complete exercises

PART A. COMMONLY-USED SERIAL TAGS

Following is a selected list of MARC tags that are frequently used in serial records or that will be found in CONSER records. Consult the *CONSER Editing Guide* or other documentation for a complete list and instructions on their use.

007	Physical description fixed field (used primarily for microforms and e-serials)
008/leader	Fixed field display found in workforms on OCLC or local systems; serials fixed field is used for all printed serials, microforms, and computer files that are textual; for serial maps, sound recordings, etc. the map, etc. 008 is used with a serial 006
