Session 1

Introduction to Integrating Resources

Welcome

- Introductions
- Logistics
- Overview of Schedule

Outline of the workshop

- Session 1: Introduction to online IRs
- Session 2: Tools & Decisions
- Session 3: Original cataloging of IRs
- Session 4: Finding and Working With Cataloging Copy
- Session 5: Modifying Records for Integrating Resources
- Session 6: Case studies

Session 1

1. Introduction to workshop
2. What is an online integrating resource?
3. How does an e-IR differ from other forms of issuance?

Integrating Resources

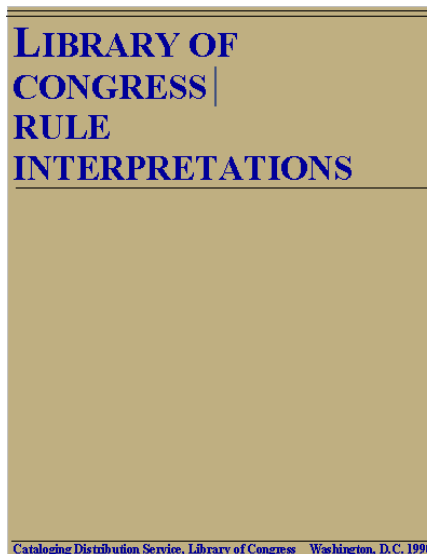

- Definition

A bibliographic resource that is **added to or changed by means of updates**

- that do not remain discrete and
- [that] are integrated into the whole

Can be finite updating or continuing indefinitely.

WELCOME TO GISP's GLOBAL INVASIVE SPECIES DATABASE

ISSG IUCN LANDCARE SCOPE CABI DIVERSITAS

Dear users, this database is currently being populated with species information. Please check on a regular basis for updates. In the meantime, if you feel we can be of assistance, please contact us at: issq@auckland.ac.nz

Hints to start exploring the database:

Click the red 100 of the World's Worst Invasive Species button at the top right.

Type a common name, e.g. snake into the Species Name field and click Search.

Three major types of IRs

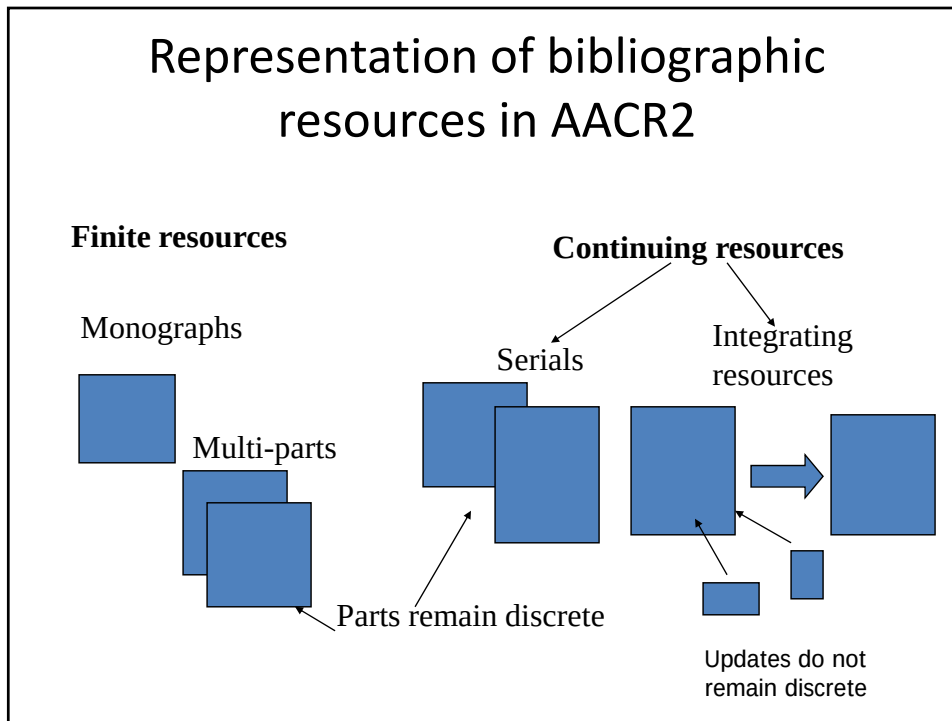

- Updating Loose-leaf
 - Examples: AACR2, CONSER Editing Guide, LCRIs, many law reporters and legal loose-leaf services
- Updating Database
 - Examples: OCLC WorldCat, ProQuest, Books in Print online, Epicurious
- Updating Web Site
 - Examples: LC Web site, CONSER Web site, University of Washington Web site

Continuing resource

- Definition

A bibliographic resource that has **no predetermined conclusion.**

- Umbrella concept used to group serials and integrating resources.
- Provides a collective term
- Title for AACR2 Chapter 12

Integrating resources & serials

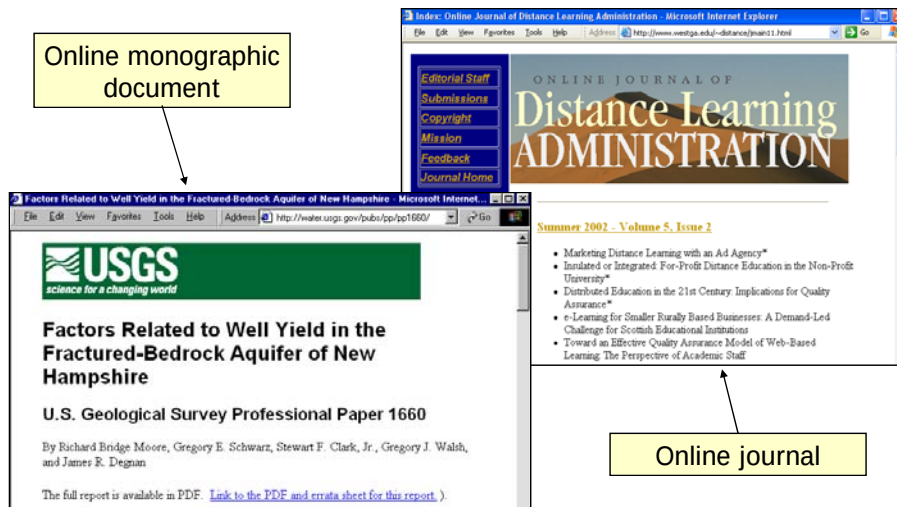

- The primary difference:
 - Serials: issued in **discrete parts**
 - Integrating resources: issued with **updates that do not remain discrete**

Integrating resources & monographs

- The primary differences: Monographs
 - Single item: Fixed, **static**
 - Multipart: issued in **discrete parts**

Resource may be mono or serial

Online monographic document

Finite Updating Web Site

Iteration

- Definition

An instance of an integrating resource

- either as first published
- or after it has been updated.

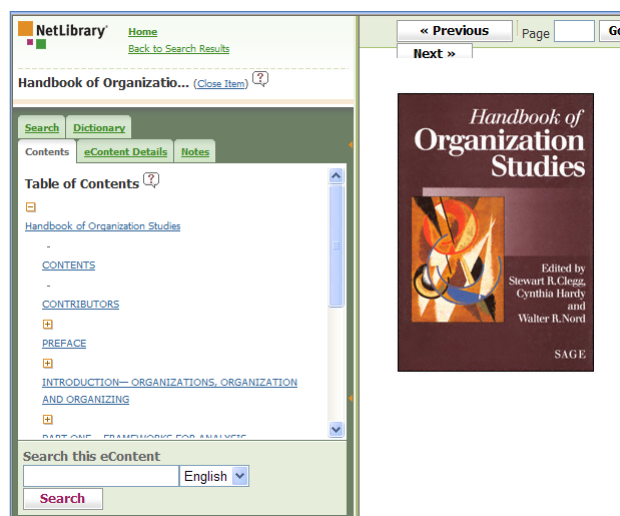

Instructions

For each of the resources, answer the questions:

1. Is this a monograph, a serial, or an integrating resource?
2. Why or why not?

Satellites visible over Los Angeles

Artificial satellites orbiting the Earth are visible 1-2 hours after sunset and 1-2 hours before sunrise, while the ground is dark but the satellite is in sunlight because of its high altitude. This page lists predicted visibility times for some large and bright satellites of astronomical interest. These are easily visible even from the city of LA! The satellite will look like a moving star.

If you don't live in LA, the predictions on this page will not be useful for you, but the German Aerospace Center has a great [satellite prediction page](#). Be sure to look at the Iridium flares! [Here's](#) a bright one over UCLA.

All times and dates Pacific Standard Time or Pacific Daylight Time.

Satellites with thrusters are sometimes [way behind schedule](#), but these times are usually good to better than a minute.

Click on an entry to see a stargate with the satellite track. Planets and the Moon are in red, the satellite track is in blue.

Status of Document: DCMI Recommended Resource

Description of Document: This document is intended as an entry point for users of Dublin Core. For non-specialists, it will assist them in creating simple descriptive records for information resources (for example, electronic documents). Specialists may find the document a useful point of reference to the documentation of Dublin Core, as it changes and grows.

Resource F

<http://dublincore.org/resources/faq/>

The screenshot shows the Dublin Core Metadata Initiative website. At the top is an orange navigation bar with the DCMI logo and links for 'ABOUT THE INITIATIVE', 'DOCUMENTS', 'GROUPS', 'RESOURCES', 'DCMI NEWS', 'TOOLS AND SOFTWARE', and 'PROJECTS'. Below the bar is a breadcrumb trail 'Home > Resources > FAQ >' and a search box. The main heading is 'DCMI Frequently Asked Questions (FAQ)'. A list of 19 numbered questions follows, covering topics like metadata, resource discovery, Dublin Core elements, and implementation. The questions are:

1. What is metadata?
2. Where is the metadata on the Dublin Core website?
3. What is a resource?
4. What is resource discovery?
5. What is the Dublin Core Metadata Initiative?
6. What is the Dublin Core?
7. What is the Dublin Core Metadata Element Set?
8. Who can benefit from using the Dublin Core Metadata Element Set?
9. What is the difference between "Simple" ("unqualified") and "Qualified" Dublin Core?
10. Should I use Simple or Qualified Dublin Core?
11. How do I begin implementing the Dublin Core Metadata Element Set?
12. What is the relationship between the DCMI and other Internet standards groups?
13. Was the Dublin Core intended to be used only for digital or Web-based resources?
14. How is Dublin Core metadata used?
15. How is Dublin Core metadata stored?
16. How can I embed Dublin Core metadata within my HTML documents?
17. What is the relationship between Dublin Core Metadata and RDF and XML?
18. What is the Dublin Core data model?
19. How do I participate in discussions about the Dublin Core?

#2. Film literature index

<http://webapp1.dlib.indiana.edu/fli/index.jsp>

Introducing the FLI Online >>

The *Film Literature Index* (FLI) annually indexes 150 film and television periodicals from 30 countries cover-to-cover and 200 other periodicals selectively for articles on film and television. The periodicals range from the scholarly to the popular. More than 2,000 subject headings provide detailed analysis of the articles.

The [National Endowment for the Humanities](#) awarded Indiana University a grant in 2002 to convert the print version of the *Film Literature Index* to electronic form. The FLI Online contains approximately 700,000 citations to articles, film reviews and book reviews published between 1976-2001.

For more information about the FLI project, visit the [About FLI](#) page.

Exploring the FLI Online >>

Office of the Historian

Presidents and Secretaries of State Foreign Travels

Presidential Visits Abroad

Preface

Visits Abroad of the Presidents of the United States, 1906-2004, prepared by the Office of the Historian, Bureau of Public Affairs, presents basic information concerning trips taken outside the United States by the President of the United States. It includes the first visit abroad, made by President Theodore Roosevelt, through President George W. Bush's foreign travels through December 2004.

Entries cover all official visits to foreign countries made by U.S. Presidents during their tenure as President or President-elect. They also include instances of unofficial travel to foreign countries by a President or President-elect for vacation purposes, when information concerning such visits is available. Coverage, however, does not include Presidential trips to U.S. territories overseas, days spent at sea in international waters, or stops at uninhabited islands.

Entries include the name of the President, the country and the city (locale) or dependent area visited, the inclusive dates of the visit, and highlights relating to each visit. When a locale is mentioned for a dependent area, the dependent area appears in parentheses. When multiple locales appear, they are in the order visited. Under the highlights section the characterization of a visit as "state," "official," "informal," or "private" is given on the basis of official announcements at the time. A state or official visit is one made at the invitation of a foreign chief of state. Visits made as President-elect are indicated in brackets.

The visits are listed in two separate sections: chronologically by President and alphabetically by country. Visits to dependent territories are included under the country having sovereignty over the territory at the time of the visit. For example, visits to Bermuda are found under the United Kingdom. In the country list, entries for countries that no longer exist have been moved under the name of the successor state and cross references provided as

#15. IraqSlogger
<http://www.iraqslogger.com/>

The screenshot shows the IraqSlogger website homepage. At the top, there are several banners: "AfPax INSIDER" with the tagline "Clarity is coming to the world's most dangerous region.", "IRAQSlogger" with the tagline "INSIGHTS SCOOPS & BLUNDERS", and "THE BRIDGES OF BAGHDAD" with a call to "ORDER YOUR COPY TODAY". Below these is a navigation bar with links: Home, IraqSide, StateSide, ViewPoint, StreetFight, MediaWatch, StatCrunch, BorderWatch, AboutUs, and SlogAds. A search bar is also present. The main content area features a "SUBSCRIBE NOW" button, a "SLOGGER NETWORK IraqSide" section with a post titled "Liquor Sellers Open in ex-Militant Stronghold" and a map of Adil, and a large advertisement for "Your One-Stop Iraq Info Source" with a "SUBSCRIBE NOW!" button. On the right, there is an "Iraq Ticker" section with news items. The left sidebar contains links for "Announcing Slogger by Subscription!", "Email address:", "Password:", "Log in", "PremiumReports", and "FreePosts".

#16. Urban archives database
<http://content.lib.washington.edu/uaweb/index.html>

The screenshot shows the Urban Archives Database website. At the top, there is a "University of Washington Libraries" header with a "Quick Search" bar and a "SEARCH" button. Below this is a "Digital Collections" section with links for "Special Collections", "All Collections", "Topics", and "Search All Collections". The main content area is titled "Urban Archives Database" and includes a description of the project, a search box, and a list of sample searches. The sample searches include: Electric Signs, Yard Art, Ghost Signs and Painted Walls, Seattle Views, Hand Styles, and Windows. At the bottom, there is a large image of a building facade with a sign.

LOS ANGELES CONSERVANCY
For more info about the LA Conservancy

Curating the City is a new educational program from the Los Angeles Conservancy that treats the city as a living museum, offering a fresh look at L.A.'s architectural and cultural heritage. Through architectural tours, related events, and permanent resources, *Curating the City* encourages the ongoing exploration – and appreciation – of L.A.'s unique built environment. The pilot program for *Curating the City* focuses on the great Wilshire

Tools and Decisions

Session 2

1. What tools can help?
2. What decisions need to be made?

Tools

PCC documentation:

Integrating Resources: a cataloging manual

<http://www.loc.gov/catdir/pcc/bibco/irman.pdf>

Based on:

- AACR2, 2nd ed. (esp. Chapters 1, 9 & 12)
- And corresponding Library of Congress Rule Interpretations (LCRIs)

Other tools

- MARC 21 Format for Bibliographic Data
(Cataloger's Desktop,
http://www.loc.gov/marc/bibliographic/ecbdh_ome.html)
- OCLC (Including Bibliographic formats and Standards
http://www.loc.gov/marc/bibliographic/ecbdh_ome.html)

Tools continued

- Internet Archive
(<http://www.archive.org/web/web.php>)
- OLAC CAPC Source of Title Note for Internet Resources
(<http://www.olacinc.org/capc/stnir.html>)

IR manual

**Integrating Resources:
A Cataloging Manual**

**Appendix A to the BIBCO Participants'
Manual**

and

**Module 35 of the CONSER Cataloging
Manual**

IR manual: objectives

- Define “integrating resource”
- Instruct: IR bibliographic record creation
- Instruct: updating bibliographic record
- Distinguish IR from mono- or serial cataloging
- Inform: special considerations in the cataloging of integrating resources

IR manual: what’s new?

Essentially 3 major areas:

- Provider neutral policy (IR.2)
- Better explanation of language versions policy (IR. 4.2.1)
- Option to apply CONSER standard record

IR manual: what's new: "Provider neutral"

In the manual: IR.2

Scope:

E-IRs "that are available simultaneously from two or more different electronic service providers (one of which may or may not be the original publisher or society) but are essentially the same resource and consist of the same content"

IR manual: what's new: "Provider neutral"

The screenshot displays the AGRICOLA website, which is part of the National Agricultural Library (NAL) and the United States Department of Agriculture (USDA). The top navigation bar includes links for COS Home, About, Instructions, Subscribe, and Help Desk. A sidebar on the left lists various services such as COS Services, Journal Index, Author Index, Keyword Index, Query Track, Legal Disclaimers, and login options for individual users. The main content area features a search bar and a list of search options: Main Search, Subject Search, Advanced Search, and Major U.S. MARC Field Search. It also mentions that the database is updated monthly and was last updated on December 29, 2006. Below this, there is a section for the NAL Catalog, which provides citations to agricultural literature. The interface includes a search box with a 'Go' button, a 'Browse by Audience' section, and a 'Browse by Subject' section. A 'Quick Searches' section is also present, allowing users to enter a single word or phrase. The bottom right corner features a 'I Want To...' section with links for asking questions, searching both databases at once, requesting library materials, and finding AGRICOLA help information.

IR manual: what's new: "Provider neutral"

Section IR2 of the manual:

- Has statement of scope
- Features of E-IR provider neutral policy
 - Applicable to all provider versions
 - Added entries only for original producer/society (e.g., for Agricola: National Agricultural Library)
 - Note indicating provider version cataloging is based on:
500 Title from home page (Community of Science, viewed Nov. 18, 2008)

IR manual: what's new: "Provider neutral"

Section IR2 of the manual cont'd:

- Field by field table for record creation
- Guidelines: consolidation of duplicates
- Types of resources
- Example of Agricola IR

IR manual: what's new: language versions

- IR.4.2.1 “Online integrating resource in multiple languages” [section under review]
 - Is the full content of the site available in another language?
 - Separate ISSNs assigned to each language version?
 - Language version have edition/version statements? (e.g., CNN en Español; CNN Türk.com)

IR: Language versions: example

IR: Language versions: example

Internet Archive: what it is

First steps in original cataloging [1]

1. What **aspect/part of the resource** are you cataloging?

- E.g., the whole or a part of a larger resource --See LCRI 1.0

2. What is the **type of issuance of that aspect?**

- For the purposes of this workshop, integrating entry is the type of issuance we are dealing with.

First steps in original cataloging [2]

3. What is the **primary content of the resource**?

- E.g., textual, cartographic, visual, sound, computer file
- Affects which Type of Record and 008 / OCLC workform you use

4. Which **iteration** do you have?

- First, last, or other iteration
- Affects especially how you record dates of publication

First steps in original cataloging [3]

5. Is the resource distributed by **more than one provider**?

- Generally applies to a database

6. Has this resource changed over time?

7. Is this related to other resources?

8. How to describe this resource: Integrating resource

- PCC or non-PCC?
- Apply CONSER standard record options?

Example: Dig. Lib. Slovenia: http://www.dlib.si/dlib.asp

dLib.si
Digitalna knjižnica Slovenije

8. How to describe this resource: Integrating resource

*THIS PAGE INTENTIONALLY LEFT BLANK
FOR DOUBLE SIDED COPY*

Session 3a

Original Cataloging of Integrating Resources

Goals for Session 3

1. Learn the basics of original cataloging of integrating resources
 - With a focus on *electronic* integrating resources
2. Understand how to apply the new AACR2 rules for integrating resources
 - Primarily chapter 12, but also chapter 9 for electronic IRs (or appropriate format-specific chapter)
3. Understand how to apply MARC21 coding practice for integrating resources

Outline of Session 3

Session 3a:

1. MARC leader and control fields
2. Bibliographic description: basis, chief source
3. Title, Edition, Publication data,

Session 3b:

1. Bibliographic description: continued
2. *Linking entries*
3. Access points

Session 3 Exercises

Cataloging Examples

MARC Leader and Control Fields

- Type of record (OCLC “Type” = Leader/06)
 - Primary content
- Bibliographic level (OCLC “BLvl” = Leader/07)
 - Type of issuance
- Control fields 006 and 008 (OCLC fixed fields)
 - Fixed length coded data elements for different types of material (e.g., books, maps, computer files, etc.)
- Control field 007
 - Physical characteristics fixed field

Type of record (OCLC: Type)

- Select code for primary content of resource
 - Regardless of physical carrier (print, electronic, etc.)
- For example:
 - **a** – Language material
 - Includes primarily textual Web sites & databases, disregarding incidental images, search software, etc.
 - **m** - Computer file
 - Restricted to computer software, computer-manipulable numeric data, computer-oriented multimedia, online systems or services
 - **e** – Cartographic material
 - **k** – Still images (“two-dimensional non-projectable graphic”)
 - **g** – Moving images (“projected medium”)
 - **j** – Musical sound recordings

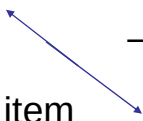

Bibliographic level (OCLC: BLvl)

- **m** – Monograph
- **s** – Serial
- **i** – **Integrating**
- All updating loose-leafs, updating Web sites, and updating databases are integrating

Electronic resources elements: Fixed Field/006

- Form of item (OCLC: Form and Orig)
 - Code “**s**” – Electronic
 - Use this code for all electronic resources in:
 - “Form of Item” (008/23; 006/06)
 - “Form of Original Item” (008/22; 006/05)
- Type of computer file (OCLC: File)
 - See Appendix A for list of codes
 - Use this code in Electronic resources/Computer files 008 or 006
 - [Will cover use of different codes in Session 5 of this workshop]

Continuing resources elements: Fixed Field/006

- Frequency
 - Regularity
 - **Type of continuing resource**
(formerly: Type of serial)
 - ISSN center
 - Form of original item
 - Form of item
 - Nature of entire work
 - Nature of contents
 - Government publication
 - Conference publication
 - Original alphabet or script of title
 - **Entry convention**
(formerly: Successive/latest entry)
- 

Frequency (Freq) and Regularity (Regl)

Frequency codes:

Examples of selected codes; see Appendix A for complete list.

- **blank** - No determinable frequency (irregular)
- **d** - Daily
- **k** - Continuously updated (= more frequently than daily)
- **m** - Monthly
- **q** - Quarterly
- **u** - Unknown
- **w** - Weekly

Regularity codes:

- **r** - Regular
- **n** - Normalized irregular
- **x** - Completely irregular
- **u** - Unknown

Type of continuing resource (OCLC: SrTp)

- Codes for integrating resources:
 - **d** - Updating database
 - **l** - Updating loose-leaf
 - **w** - Updating Web site
- Codes for serials:
 - **m** - Monographic series
 - **n** - Newspaper
 - **p** - Periodical
 - blank – None of the others

Entry convention (OCLC: S/L)

- Codes for serials:
 - **0** - Successive entry
 - **1** - Latest entry
- Code for integrating resources:
 - **2** – Integrating entry
 - Record is cataloged under its latest (most recent) title and/or responsible person or body.
 - A new record is made only when there is a major change in edition, or it is determined that there is a new work, or for mergers and splits.

007 – Physical description control field

Computer files/Electronic resources 007 elements:

- \$a – code “c” for category “Computer file”
- \$b – code “r” for specific type “Remote access”
- \$d – select correct code for color aspects of resource
- \$e – code “n” for dimensions “Not applicable”
- \$f – select correct code for sound aspects of resource
- \$g → \$l – Optional (used primarily for archival control)

12.0B1b. Bibliographic Description Basis of the description

Areas based on current iteration:

- Title and statement of responsibility
- Edition
- Publication, distribution, etc.
 - Except dates
- Physical description
 - Optional for remote e-resources
- Series

Area based on first and/or last iteration(s):

- Dates of publication, distribution, etc.

Areas based on all iterations and any other source:

- Note
- Standard number and terms of availability

12.0B2b. Chief Source of Information

- Printed integrating resources:
 - Title page or title page substitute
- Nonprint integrating resources:
 - Follow directions in subrule .0B in the relevant chapter
- For electronic integrating resources: Rule 9.0B:
 - The chief source of information is the resource itself
 - Take the title proper from formally presented evidence
 - If the title information presented in these sources varies in degree of fullness, prefer the source that provides the most complete title information

Title and statement of responsibility

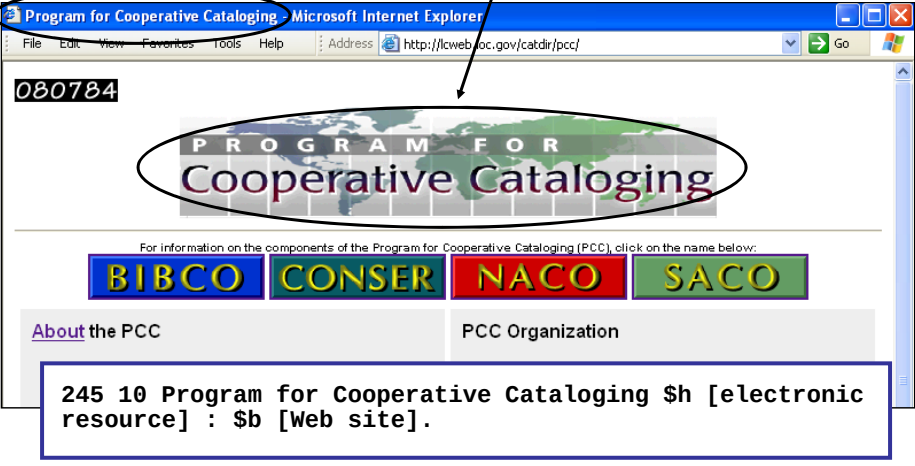

- Title proper (245 \$a, \$n, \$p)
- GMD (\$h)
- Parallel titles (\$b)
- Other title information (\$b)
- Statements of responsibility (\$c)
- Note: the MARC subfield codes given above reflect the most common situations, but there are other situations where the data elements in a title and statement of responsibility require different coding and/or arrangement.

Common sources of title proper in **online** integrating resources

- Formal title display on home page screen
 - May be HTML text, graphic (image file), or both; may appear in more than one form
- HTML header title
 - Displayed in browser title bar (also viewable by selecting *View* → *Source*)
- Sources of “formally presented” titles include:
 - title screen, main menus, program statements, initial display of information, home page, the file header including “Subject:” lines, encoded metadata (e.g., TEI headers, HTML/XML meta tags)

Source of title proper example 1

Home page title display (graphic) and HTML header title are identical

080784

PROGRAM FOR
Cooperative Cataloging

For information on the components of the Program for Cooperative Cataloging (PCC), click on the name below:

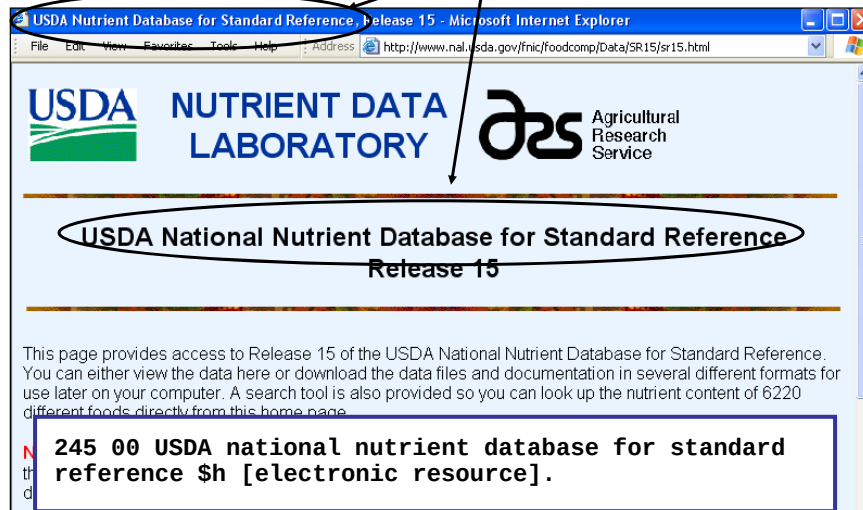

BIBCO **CONSER** **NACO** **SACO**

[About the PCC](#) PCC Organization

245 10 Program for Cooperative Cataloging \$h [electronic resource] : \$b [Web site].

Source of title proper example 2

Home page title display (HTML text)
and HTML header title are not identical

1.1B1 & 12.1B1-4. Transcription of title proper

- Do not transcribe introductory words not intended to be part of the title, such as "Welcome to"; instead give the title with these words in a note (1.1B1)
- Correct obvious typographic errors and give title as it appears in a note (12.1B1)
- When title appears in full and in the form of an acronym or initialism, choose the full form (12.1B2)
 - e.g., *Program for Cooperative Cataloging* instead of *PCC*
- If resource is a part of another resource and bears both the common title and its own section title, give both in that order, separated by a period (12.1B4)
 - Will not often apply to online resources: see LCRI 12.1B4

Transcription of title proper example 1

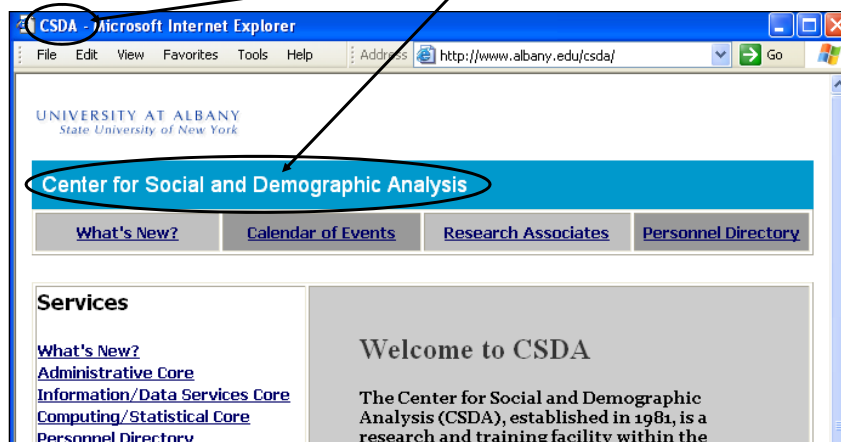

"Welcome to ..." in HTML header title

245 04 The plants national database \$h [electronic resource].
246 1_ \$i Title in HTML header: \$a **Welcome to the plants national database**
246 1_ \$i Title on home page: \$a Plants database

Transcription of title proper example 2

Title appears in full and in form of acronym

245 10 Center for Social and Demographic Analysis \$h
[electronic resource] : \$b [Web site].
246 1_ \$i Title in HTML header: \$a CSDA

Parallel title example

245 00 Government of Canada site \$h [electronic resource]
= \$b Site du gouvernement du Canada.

246 31 Site du gouvernement du Canada

Transcription of other title information: 12.1E1b

- Per 2004 update to AACR2, always include:
 - Acronym if full form is title proper
 - If contains statement of responsibility or publisher, etc.
 - Supply information if title proper is only name of body
- If important: Transcribe; or use quoted note
- Do not transcribe (12.1E):
 - Currency of the contents
 - Frequency of updating

Other title information and statement of responsibility example

245 14 The nine planets \$h [electronic resource] : \$b a multimedia tour of the solar system / \$c by Bill Arnett.

Other title information for transcription?

245 00 FirstGov \$h [electronic resource].

OR:

245 00 FirstGov \$h [electronic resource] : \$b your first click to the U.S. government.

Variant forms of title: 1.7B4, 12.7B4.1, 9.7B4, 21.30J2

- Make **notes** on titles borne by the item other than the title proper (12.7B4.1, 9.7B4)
- Make notes on **titles by which the resource is commonly known** if considered to be important (1.7B4, 12.7B4.1)
- If considered important for access, make an **added entry** for any version of the title that is significantly different from the title proper (21.30J2 & LCRI)
- In MARC record: **246 field** can serve as both note and added title entry.

31

Title variants example

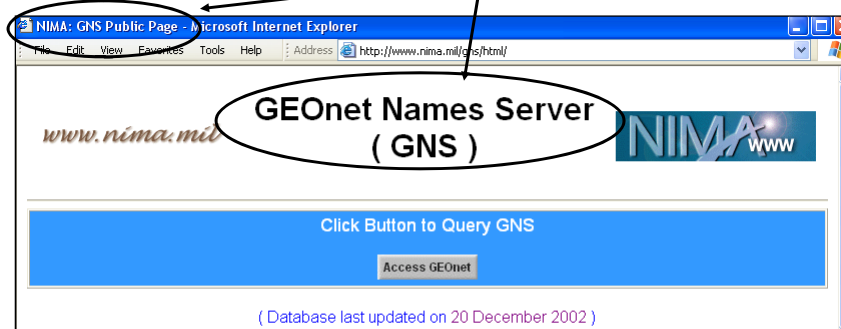

245 10 Program for Cooperative Cataloging \$h [electronic resource] : \$b [Web site].

246 1_ \$i Commonly known as: \$a PCC

32

Title variants example 3

246 30 GNS  
246 3_ GNS public page
```

Edition

- 12.2B: Transcribe an edition statement if considered to be important
 - 9.2B1: A statement that indicates that the electronic resource contains differences from other editions of that resource, or that names a reissue of the resource
 - 9.2B2: In case of doubt, take words such as edition, issue, version, etc. as indicating an edition statement
- 12.2B2: Do not transcribe statements indicating regular revision or frequent updating as edition statements
 - Instead give as frequency information in the note area (see also 12.7B1).

Edition statement example

File Edit View Favorites Tools Help Address <http://www.nal.usda.gov/fnic/foodcomp> Online updating database

USDA National Nutrient Database for Standard Reference
Release 15

This page provides access to Release 15 of the USDA National Nutrient Database for Standard Reference. You can either view the data [here](#) or download the data files and documentation in [this format](#).

How do I reference the USDA Nutrient Database for Standard Reference?

From FAQ page

U.S. Department of Agriculture, Agricultural Research Service. 2002. USDA Nutrient Database for Standard Reference, Release 15. Nutrient Data Laboratory Home Page, <http://www.nal.usda.gov/fnic/foodcomp>

Note: Release numbers change as new versions are released.

245 00 USDA national nutrient database for standard reference \$h [electronic resource].

No edition statement

9.3. Type and extent of resource [chapter 9]: 256 Field

- Eliminated with the deletion of rule 9.3 in the 2004 update to AACR2
- If using existing copy: Delete if changed

Area 4: Publication, distribution, etc.

- 9.4B2: “Consider all remote access electronic resources to be published”
- Record place of publication and publisher name.
 - Where to look in online resources:
 - Bottom of home page
 - “About” page (a common hyperlink from home page)
 - Publisher information page (link from home page)
 - Domain name in URL may provide clues or corroboration for publisher
 - Generally prefer a corporate body name as publisher

Publisher place and name example 1

The screenshot shows a Microsoft Internet Explorer window displaying the USDA National Nutrient Database for Standard Reference, Release 15. The browser's address bar shows the URL: <http://www.nal.usda.gov/fnic/foodcomp/Data/SR15/sr15.html>. The page header features the USDA logo, the text "NUTRIENT DATA LABORATORY", and the Agricultural Research Service logo. A green oval highlights this header area, with a callout box labeled "On home page" pointing to it. Below the header, the page title is "USDA National Nutrient Database for Standard Reference Release 15". A section titled "For other inquiries you can reach us by:" lists contact information. A callout box labeled "Linked information page" points to this section. The contact information includes an email address (ndinfo@rbhnrc.usda.gov) and a regular mail address. A green oval highlights the regular mail address, which is: "Nutrient Data Laboratory, Agricultural Research Service, Beltsville Human Nutrition Research Center, 10300 Baltimore Avenue, Building 006, Room 107, BARC-West, Beltsville, MD 20705-2350". At the bottom of the page, a blue box contains the text: "260 Beltsville, MD : \$b USDA Nutrient Data Laboratory, Agricultural Research Service".

Dates of publication, distribution, etc.

Beginning/ending dates: Active life span of the resource

- **Beginning date** = Date of publication of the **first iteration** of resource
- **Ending date** = Date of the **last iteration** of resource; the date it ceases to be updated

- Ongoing, actively-updated resources: (viewing 1st iteration)
260 ... \$c 2008-
- Ongoing, actively-updated resources: (otherwise)
362 1_ \$a Began in 1997?

Rules: AACR2 1.4F8, 12.4F1-2; IR 7.1-7.4

Informal quick guide for dates: RI 1.4F8

Do you have the first iteration?

- **Yes:**
 - Give a known date, or supply an approximate date in brackets, in 260 \$c
- **No, or not sure:**
 - Supply a date in brackets in 260 \$c if there is an explicit statement
 - If no explicit statement, state an approximate date in a 362 1_ note
 - A copyright date is *not* an explicit statement

Dates of publication example 1

The screenshot shows the PCC website in a Microsoft Internet Explorer browser window. The address bar shows <http://lcweb.loc.gov/catdir/pcc/>. The page title is "Program for Cooperative Cataloging - Microsoft Internet Explorer". The main heading is "PROGRAM FOR Cooperative Cataloging". Below this, there are links to "BIBCO", "CONSER", "NACO", and "SACO". The page is divided into two columns: "About the PCC" and "PCC Organization". The "About the PCC" column has links to "Información sobre el PCC en Español" and "Informações sobre o PCC em Português". The "PCC Organization" column has a link to "PCC Policy Committee, Steering Committee, and Advisors".

Annotations on the screenshot:

- 080784**: A callout box points to this number, stating: "You know that you are not viewing the first iteration. There is no information anywhere within the Web site about its beginning date".
- 260**: A callout box points to this field, stating: "No terminal punctuation".
- 362 1_ Began in 1990s.**: A callout box points to this field, stating: "Multiple dates: beginning date approximate; ending date indefinite".
- 008 DtSt: c Dates: 199u, 9999**: A callout box points to the "c" in "DtSt: c", stating: "c = currently published".

This is not publication info.!

You know that you are not viewing the first iteration

**Bottom of home page has:
© 2002**

--indicates current year; not beginning date of resource!

No ending punctuation

One option:

260 [St. Paul, MN] : \$b University of Minnesota
 008 DtSt: c Dates: **uuuu, 9999**
[No 362 1_ note given]

Dates of publication example 2: some alternative options

260 [St. Paul, MN] : \$b University of Minnesota
362 1_ Began in 1990s?
 008 DtSt: c Dates: **199u, 9999**

260 [St. Paul, MN] : \$b University of Minnesota
362 1_ Began between 1990 and 2002.
 008 DtSt: c Dates: **199u, 9999**

- There are other possible ways to word the note --if you consider that it offers useful information to catalogers and/or other catalog users in the future. If not, do not give a note.
- Might a researcher in the year 2045, for example, find such information to be of some value?

Dates of publication example 3

You know that you are not viewing the first iteration

Bottom of home page has:
© 1994-2002

--first date can be taken as probable beginning date of resource, but it is not an "explicit statement"

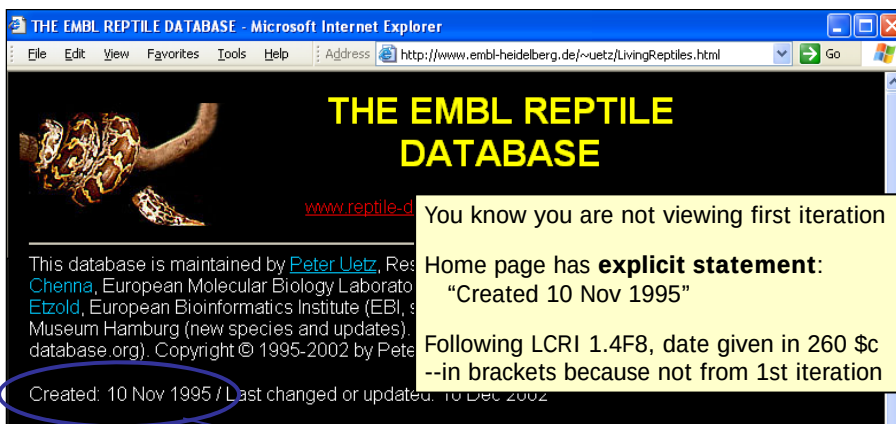

--second date = current year; not ending date of resource!

260 [Cambridge, Mass.] : \$b World Wide Web Consortium

362 1_ Began in 1994? Or: 362 1_ Began ca. 1994.

008 DtSt: c Dates: 1994,9999

Dates of publication example 4

You know you are not viewing first iteration

Home page has **explicit statement**:
"Created 10 Nov 1995"

Following LCRI 1.4F8, date given in 260 \$c
--in brackets because not from 1st iteration

245 04 The EMBL reptile database \$h [electronic resource].

260 Heidelberg [Germany] : \$b EMBL, \$c [1995]-

008 DtSt: c Dates: 1995,9999

Dates of publication example 5

You are viewing the final iteration of the Web site

The ending date is explicitly stated in this last iteration

The beginning date was not known at the time of original cataloging, and the first iteration was not available.

Statement that updates have ceased as of August 2000

This site is no longer being maintained. As of August 2000, it has been superseded by an updated [Information Systems and Technology](#) site and the [U.C. Berkeley Computing and Communications](#) site. For up-to-date information about the

260 [Berkeley, Calif.] : \$b Information Systems and Technology, University of California, Berkeley, \$c -2000.

362 1_ Began in 1990s.

008 DtSt: d Dates: 199u, 2000

d = ceased publication

Area 5: Physical description

As of the 2004 Update to AACR2, area 5 can be used for remote access resources

- Optional rules 9.5B3 and 9.5C3
- No specific PCC practice: local decision or cataloger's judgment
- LC practice: case-by-case basis

Area 6: Series

- Nothing new or different for integrating resources
- Record series statements (4XX) present on the *current* iteration of the resource
- Use MARC 440, 490, and 8XX as usual
- Not very common in online integrating resources

Bib. Description for our examples so far (1-2)

Original Cataloging, continued

- Bibliographic description
- Access points
- Final records for two resources

Notes

- **This workshop covers only notes mandatory for IRs:**
 - Frequency (310/321)
 - Nature and scope, system requirements, and mode of access (516, 538)
 - Source of title proper (500)
 - Bibliographic history and relationships (530, 580, 76X-78X)
 - Item described (500)
- MARC tagging for many notes is the same for both serials and integrating resources
 - **247/547** for former title proper information (rare for serials)
 - **310/321** for current and former frequency of updates
 - **362 1** for publication date information when not from first/last iteration
 - **550** for issuing bodies information
 - **530, 580, 76X-78X** for bibliographic relationships and links

Frequency note: 12.7B1

- Note the frequency of updates to an integrating resource
 - Fields: FF Freq/Regl; 310 (current); 321 (former)
 - LCRI 12.7B1 (LC/PCC practice):
Always give a note for known frequency of updates, even if already apparent from the rest of the description

Frequency and regularity example 1

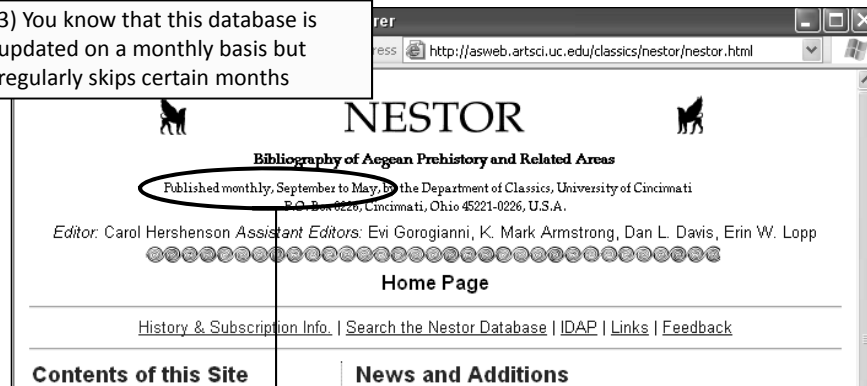

2) You know that this database is regularly updated every three months

The screenshot shows the EMBL Reptile Database website. A callout box highlights the 'Update Schedule' section, which states: 'The database is updated every 3 months (in March, June, September, and December). Depending on submissions from contributors, the amount of updated material may differ. The date of the latest update is given on the Home Page headline or on the News Page.' Below this, a cataloging example is shown:

245	04	The EMBL reptile database \$h [electronic resource].
310		Updated quarterly
008	Freq: q	Regl: r

Frequency and regularity example 2

3) You know that this database is updated on a monthly basis but regularly skips certain months

245 00 Nestor \$h [electronic resource] : \$b bibliography of Aegean prehistory and related areas.

310 Updated monthly (except June-Aug.)

008 Freq: m Regl: n

Frequency and regularity examples 3-5

4) You know that this Web site is updated on a very frequent basis
[Regl code "k" = continuously updated; defined as "more frequently than daily"]

Weather.com Web site

[<http://www.weather.com/>]

310 Continuously updated

008 Freq: k Regl: r

5) You know that this Web site is updated irregularly (no regular pattern)

CONSER Web site

[<http://www.loc.gov/acq/conser/>]

310 Updated irregularly

008 Freq: _ Regl: x

6) You know that this database is updated but have no information about how often or according to a regular or irregular pattern

Global invasive species database

[No 310 present]

008 Freq: u Regl: u

Former frequency note

245 00 Library literature & information science full text
\$h [electronic resource].

310 Updated daily, \$b <Aug. 12, 2004>

321 Updated monthly, \$b <Nov. 18, 1999>

008 Freq: d Regl: r

9.7B1. System requirements/mode of access note

b) System requirements

- Note system requirements only if special software or hardware are required to access and use the resource
 - 538 System requirements: Requires DjVu plug-in.

c) Mode of access

- Always specify the mode of access for remote access resources
 - 538 Mode of access: World Wide Web.

System requirements/Mode of access note

National NAGPRA Database

The documents related to the Native American Graves Protection and Repatriation Act are organized in the five categories listed below. The date following a document indicates its publication date. The date following a directory (shown in capital letters) indicates when the last item in the list was last updated.

See Also

Native American Consultation Database

Two directories under the Notice category contain numerous documents. A search engine is now available in each Notice directory to facilitate finding a document by specific tribe, museum, or other keyword.

The documents are provided in text and PDF format. The user must have a PDF viewing software such as the free AdobeTM Acrobat Reader to view the PDF documents. Another option is to choose "load to local disk" option from the Options menu on Mosaic or the "Save As..." option from the File menu on Netscape to download the file and view it later.

538 System requirements: Adobe Acrobat reader to view and print PDF files.

538 Mode of access: World Wide Web.

Source of title proper note: 12.7B3

- Follow the instructions in sub-rule .7B3 in the chapter dealing with the type of material to which the resource belongs
- For remote electronic resources: 9.1B2 & 9.7B3:
 - Always give source of title proper in a note
 - Examples given in 9.7B3 and 12.7B3 include:
 - Title from title screen
 - Title from home page (viewed on Dec. 18, 1999)
 - ↓
 - (Source of title proper note combined with item described note)
 - Supplier-neutral records will show supplier as well as date viewed
 - Title from main search screen (Community of sciences, viewed Aug. 22, 2007).

Source of title; Item described note

Always give the date on which the resource was viewed for description (see also 9.7B22)

- Title from home page (viewed on Jan. 13, 2000)
- Title from search screen (Community of Science, viewed Aug. 22, 2007).

Combined source of title proper and item described notes example

245 00 USDA national nutrient database for standard reference \$h [electronic resource].

500 Title from home page (viewed on Dec. 15, 2002).

Area 8: Standard number and terms of availability: 12.8

- Record standard numbers
- Standard Number (12.8B1)
 - ISBN: 020
 - ISSN: 022
- LCRI 12.8B1: If an integrating resource has both, give both in the catalog record.

Access Points: Main and added entries

Determine name and uniform title entries

- Based on AACR2 chapter 21
 - Persons and bodies that bear responsibility for the intellectual or artistic content of the resource
 - Uniform titles for resources dealing with works of literature, music, etc.
- Enter in MARC 1XX and 7XX fields
 - In full-level records, 7XX entries must be explained (“justified”) by being given in the descriptive part of the record (MARC 2XX-5XX)

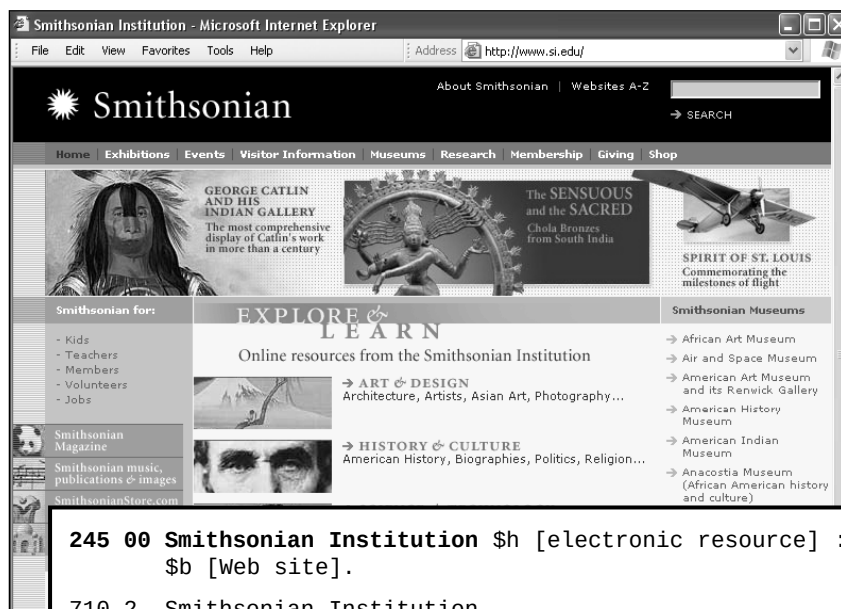

Corporate body main entry example

110 2_ Program for Cooperative Cataloging.

245 10 Program for Cooperative Cataloging \$h [electronic resource] :
\$b [Web site].

Title main entry example

**245 00 Smithsonian Institution \$h [electronic resource] :
\$b [Web site].**

710 2_ Smithsonian Institution.

Electronic location and access

- MARC 856 field
 - Indicators:
 - First indicator = access method
 - Second indicator = relationship
 - Most commonly used subfields:
 - Subfield \$u = uniform resource identifier (URI)
 - Subfield \$z = public note
 - Subfield \$3 = materials specified note
- Serves as active hyperlink from the catalog record to the online resource in Web-based catalogs

856 Examples

245 10 Program for Cooperative Cataloging \$h [electronic resource]
: \$b [Web site].
856 40 \$u <http://lcweb.loc.gov/catdir/pcc/>

245 00 Charta \$h [electronic resource] : \$b scegli charta e il
biglietto tuo.
546 In Italian; includes English version.
856 40 \$u <http://www.charta.it/>
856 40 \$3 **English version** \$u <http://www.charta.it/english/index.php>

245 00 OCLC firstsearch \$h [electronic resource].
856 40 \$u <http://www.ref.oclc.org:2000> \$z **Requires authorization
and password**

URL in 856 must match granular level of description

<http://www.un.org/>
= URL for whole Web site

<http://www.un.org/english/>
= URL for English language portion of Web site

URL in 856 40 must match granular level of resource you are selecting for description in the body of the bibliographic record.

Internal bookmarks in 856 URLs must also match

http://dublincore.org/resources/faq/
= URL for whole FAQ document

http://dublincore.org/resources/faq/#whatisanattributevaluepair
= URL for bookmarked sub-section of FAQ

856 40 \$u http://dublincore.org/resources/faq/

URL in 856 40 must match the level of a Web resource selected for cataloging; must not contain an internal "bookmark" to a sub-section within a page **unless** that is the specific section being cataloged. HTML bookmarks are indicated by the "#" sign.

Beyond AACR2: Subject headings and classification

- Do the same thing as for non-integrating resources, but keep in mind the changing content
 - **Analyze the subject content** of the resource at the selected granular level
 - **Assign subject headings** from a standard scheme
 - LCSH, MeSH, etc.
 - May also assign a **classification number** from a standard scheme
 - LCC, DDC, etc.
 - Class portion alone may suffice in master records

*THIS PAGE INTENTIONALLY LEFT BLANK
FOR DOUBLE SIDED COPY*

Session 4

Finding and Working With Cataloging Copy

Goals of Session 4

- Develop effective strategies for searching for and identifying catalog records for IRs
- Understand how to use and modify records cataloged under former rules and practices

Before you search ...

- What iteration do you have and what other iterations may have existed in the past?
 - Some “detective work” may be in order
 - Examine resource thoroughly
 - If applicable, search Internet Archive
- Determine variants of: Title, publisher, responsible person/bodies, URL
- Design effective searches in local catalog(s) as well as bibliographic utility (OCLC)

Internet Archive

Wayback Machine:

<http://www.archive.org/web/web.php>

- Basic search: enter URL (“Take me back”)
- Advanced search: many options
- Results: ordered by year

OCLC searching

- Search by URL (or portions thereof)
 - Access method (am:)
 - Access method phrase (am=)
- Limit by format, Internet resource, other limits
 - mt:cnr (continuing resource) or mt: int (integrating resource)
 - mt: web (Internet resource)
 - ll:eng (limit to English-language catalog records)
- Also: any other “traditional” OCLC search

Exercise

- 1) Examine the following Web site:
<http://www.techstreet.com/>
- 2) Go to the Wayback Machine:
<http://www.archive.org/web/web.php>
 - Search the above URL; review results
 - What conclusions (if any) would you draw about this integrating resource?

Exercise (continued)

3) Search OCLC for cataloging copy

- What searches did you use?
- What did you find?

4) What new conclusions (if any) would you draw about this integrating resource?

Evaluating OCLC copy

- Note carefully when the record was created
 - Before Dec. 1, 2002
 - Dec. 1, 2002-June 2006
 - June 2006-present
- Cataloging rules and practices differ
- OCLC input standards differ
- Potential for duplicate records

Records before Dec. 1, 2002

Cataloged as monographs (BLvl = m)

- Online resources usually = Type: m
- No 006 coding for serial aspects
- Former title(s) in 246 or 500
- 260 \$c not necessarily from first iteration
- Frequency of updates noted in 500, if at all
- Bibliographic relationships noted in 500;
no 7xx links

Example: Pre-Dec. 2002

```

OCLC: 50863495
Type: m  ELvl: I  Srce: d  Audn:      Ctrl:      Lang: eng
BLvl: m  File: m  GPub: f  MRec:      Ctry: mdw
Desc: a                               DtSt: m  Dates: 2002,9999

007    c $b r $d m $e n
245 00 USDA national nutrient database for standard reference
      $h [electronic resource].
246 1_ $i Title from HTML header: $a USDA nutrient database
      for standard reference
250    Release 15.
256    Electronic data and program.
260    Beltsville, Md. : $b USDA, Nutrient Data Laboratory,
      Agricultural Research Service, $c [2002]-
538    Mode of access: WWW browser; files also available for
      download in DBF or ASCII text format.
500    Title from Web page (viewed on Oct. 25, 2002).
650 _0 Food $x Composition $v Databases.
856 40 $u
      http://www.nal.usda.gov/fnic/foodcomp/Data/SR15/sr15.html
    
```

Records Dec. 1, 2002-June 2006

“Interim” coding for integrating resources

- Books format (BLvl = m)
- New fixed field codes SrTp and S/L
 - SrTp = d, l, or w
 - S/L = 2 (integrating entry)
- 006/007 coding for continuing resource and computer file characteristics
- Use of 247, 310, 362 and other continuing resource-type fields

Example: Interim method

```

OCLC: 79715966
Type: a  ELvl: L  Srce: d  Audn:      Ctrl:      Lang: eng
BLvl: m  Form: s  Conf: 0  Biog:      Mrec:      Ctry: mdu
      Cont:      GPub: f  LitF: 0  Indx: 0
Desc: a  Ills: a  Fest: 0  DtSt: m  Dates: 199u, 9999

006    m    d f
006    suu wss f 0 2
007    c $b r $d c $e n
245 00 USDA national nutrient database for standard reference
      $h [electronic resource].
246 1_ $i Title from HTML header: $a USDA nutrient database
      for standard reference
260    Beltsville, Md. : $b USDA, Nutrient Data Laboratory,
      Agricultural Research Service
362 1  Began in 1990s.
500    Description based on: Release 15 (2002); title from
      title screen (viewed Dec. 16, 2002).
856 40 $u http://www.nal.usda.gov/fnic/
      cgi-bin/nut%5Fsearch.pl
    
```

Records June 2006-present

Full implementation for integrating resources

- Continuing resources format (BLvl = i)
- Fixed field codes for continuing resources
- 006/007 coding for computer file characteristics
- Guidelines for converting earlier records:
 - OCLC Technical Bulletin 252
 - IR Manual 14.1 and 16.3

What to do?

- Modify OCLC master record
 - Authorization level?
 - LC or PCC records involved?
- Report changes needed/duplicate records
 - OCLC Quality Control
 - Library of Congress (for DLC records)
- Consult:
 - IR Manual 14.1 and 16.3
 - OCLC Bibliographic Format and Standards

Exercise

- 1) Evaluate the OCLC catalog records you have available for the TechStreet Web site
- 2) Which record would you choose to use?
Why?
- 3) What will you do with the remaining records?

Session 5

Modifying Records for Integrating Resources

Goals of Session 5

- Learn how to update an existing IR record when the resource has changed
- Understand how to apply AACR2 (rev.) and current OCLC input standards

Review: Basis of the Description

AACR2 12.0B1

Area	Basis of Description
Title and statement of responsibility	Current iteration
Edition	Current iteration
Place and publisher/distributor	Current iteration
Dates	First and/or last iteration
Series	Current iteration
Notes	All iterations/any source
Standard numbers	All iterations/any source

Integrating entry cataloging

- Bibliographic record reflects the most recent iteration of the resource
- Information about previous iterations recorded in notes
- New record is created only for certain types of new editions or works; also for mergers and splits

What might change?

- Title proper
- Variant titles
- Responsible persons or bodies
- Standard number(s)
- Frequency
- Electronic location and access
- Resource may cease

Changes in title proper

AACR2 12.1B8 and 21.2B1

- Do not create a new record
- Change 245 to reflect current title
- Move earlier title(s) to 247 (in general)
 - Record applicable dates in \$f (LCRI)
 - 247 generates note and title added entry
 - Use 547 field for more complex notes

Changes in title proper and links

Please note:

- **If** you change a title proper (245) in a bibliographic record,
- **And** that title/bibliographic record is used as a link in another record ...
- **Then** you must change the linking field in the other record to match your new 245

Parallel title/other title information

- Update 245 \$b information to reflect the current iteration
 - Applies only if other title information is already recorded in the record
- Make a note regarding the earlier information only if considered important
 - Use 246 \$i and \$f (use 247 only for former title proper information)

Statement of responsibility

- Update 245 \$c information to reflect the current iteration
- Make a note regarding the earlier information only if considered important
 - Use 500 (for persons) or 550 (corporate bodies)

Place or name of publisher

If the place and/or name of the publisher, distributor, etc. changes:

- Change the 260 \$a and \$b to reflect the current iteration
- Give the earlier place and/or name in a 500 note if considered important
 - Also change 008 Place of publication code

When resource has ceased

(i.e., is no longer being updated)

- Close off record
- Record ending date if known:
 - 260 \$c if viewing last iteration
 - 362 1_ if last iteration not available or uncertain
- Change 008 Date 2 from “9999” to ending date

When to create a new record

- Split or merger of titles
- Edition statement changes and earlier edition still exists online
- URL changes but original URL is still active and links to a completely different resource
- Create reciprocal linking fields in both old and new records (earlier/later title links)

Links between records

- To express reciprocal relationships
- To explain the bibliographic history
- AACR2 12.7.B8
 - Continuations, mergers, splits, absorptions
 - Translations, simultaneous editions
 - Supplements, other related works
- Also: Other physical formats (not in 12.7.B8)

Types of links in records

Integrating resource ↔ Integrating resource

Integrating resource ↔ Serial

Integrating resource ↔ Monograph

But not:

Monograph ↔ Monograph

What linking fields do

- Connect related records in a database
- Generate notes

780 00 \$t Performance practice review \$w ...
generates this note:
Continues: Performance practice review.
- In some OPACs, also serve as added entries
 - Indexed in local systems and retrieved as such

Chronological relationships

- Sequential (in time)
 - Simple: continues/continued by
 - Complex: split into, merged to form, absorbed
- Some examples:
 - Print serial continued by online database
 - Two print serials and a looseleaf service cease and merge into a single Web site
 - An online database separates from a print serial

Example 1

In record for current title:

245 00 IBRR online \$h [electronic resource].
260 00 Evanston, IL : \$b American Theological Library Association
780 00 \$t Index to book reviews in religion \$x 0887-1574
\$w (DLC) 87644102 \$w (OCoLC)13114508

In record for previous title:

245 00 Index to book reviews in religion.
785 00 \$t IBRR online \$w (OCoLC)62512158

Example 2

In record for current title:

245 00 ScienceDirect \$h [electronic resource].
260 00 New York : \$b Elsevier Science
362 1_ Began in 1999.
780 05 \$t IDEAL \$w (OCoLC)38111407

In record for previous title:

245 00 IDEAL \$h [electronic resource].
260 00 [Orlando, Fla.] : \$b Academic Press
362 1_ Began in 1997; ceased on Dec. 31, 2002.
785 04 \$t ScienceDirect \$w (OCoLC)45128052

Horizontal relationships

- Different versions of the same resource
 - Simultaneous: language or physical format
 - In time: Reprints, translations, supplements, reproductions
- Some examples:
 - Print serial also issued as an online database
 - Four map serials also issued as a combined online GIS database
 - A CD-ROM serial also issued as an online database

Example 3

In record for one title:

245 00 Environmental knowledgebase \$h [electronic resource].
776 08 \$i Also available in a CD-ROM version as: \$t Environmental
periodicals bibliography (CD-ROM) \$x 1053-1440
\$w (DLC)\$n 90003252 \$w (OCoLC)22461337

In record for the other title:

130 00 Environmental periodicals bibliography (CD-ROM)
245 10 Environmental periodicals bibliography \$h [electronic
resource].
776 08 \$i Beginning in 1998, also available as an online database:
\$t Environmental knowledgebase \$w (OCoLC)41106254

Common MARC 21 linking fields

780 Preceding entry	765 Original language
785 Succeeding entry	767 Translation
787 Nonspecific relationship	775 Other edition
	776 Other physical format

- Note fields:
 - 530 Additional physical form available
 - 580 Linking entry complexity note

Components of linking fields

- Catalog entry: \$a, \$b, \$t, \$s
 - Catalog entry form from the related record
 - 130 and/or 1XX, 240 and 245 fields
- Standard numbers: \$x, \$z
- Control numbers: \$w

See LCRI 12.7B8 for more information and exceptions

Linking fields: Indicators

- First indicator
 - 0 Display a note (usually)
 - 1 Do not display a note
- Second indicator
 - Varies depending on the field
 - Used to determine display constant in OPAC
 - 776 0_ Available in another form:
 - 787 0_ Related item:

Linking fields: Subfield conventions

- Punctuation:
 - Ending punctuation only in \$a and in \$s (and \$t if followed by \$b)
- Initial articles:
 - Omit unless the intent is to file on, e.g. Los Angeles

Reciprocal linking notes

- Relationship cannot be adequately expressed through MARC coding available
- Cataloger wants to give more information
- Examples:
 - 530 Issued also as an updating Web site with the title: Environmental action online.
 - 580 Continued by two online databases: Chem abstracts, and: Chem supplements.
 - 580 Issued also online, 1999-2001; after 2001, issued online only with title: Politico online.

Ongoing maintenance issues

- How to track changes?
- Who will do it?
- Cooperative programs for maintenance of catalog records for IRs?
- Role of PCC and Enhance libraries

*THIS PAGE INTENTIONALLY LEFT BLANK
