

948d. Cataloging Effort Codes (REV Jan. 14, 2009)

Code: 1

Monographs and Integrating resources: Roughly equivalent to “Copy” or “Minimal with copy” on existing CMC stats collection sheets. Accepting existing copy with no changes or with one or two small changes (e.g., correcting a typo; straightforward completion of CIP).

Serials: Roughly equivalent to CONSER copy cataloging. Matching and verification only.

Code: 2

Monographs and Integrating resources: Roughly equivalent to “Partial-DLC/NLM” on existing CMC stats collection sheets. Using existing copy with a few changes, for example, complex CIP copy or addition of an 856 field.

Serials: Roughly equivalent to CONSER copy cataloging with addition of 856 field. Matching and verification plus addition of 856 field.

Code: 3

Monographs and Integrating resources: Roughly equivalent to “Partial-Contributed” and “Minimal no copy” on existing CMC stats collection sheets. Creating a K-level original record; creating an original record based on copy for a variant edition; or using existing copy but significantly modifying or supplying one of the four elements of a full-level cataloging record: (a) description (for example, a contents note); (b) choice of entry and name access/856 field access; (c) subject access; (d) classification.

Serials: Roughly equivalent to CONSER partial or K-Level original.

Code: 4

Monographs and Integrating resources: Roughly equivalent to “Original” on existing CMC stats collection sheets. Creating an original record including full subject analysis and classification; or using copy that requires substantive modification or supplying of two or more of the four elements of a full-level cataloging record: (a) description; (b) choice of entry and name access/856 field access; (c) subject access; (d) classification.

Serials: Roughly equivalent to CONSER original

Special Collections Cataloging (added Jan. 14, 2009)

Special Collections catalogers who need to indicate that fields specific to special collections cataloging have been included in one of the effort levels listed above will add a “+” to the effort code. There should be no space between the code and the “+”. *The use of the “+” is restricted to special collections.*

For other than new-title cataloging:

Add one of the following abbreviations as appropriate to the Cataloging effort code (*there should be no space between the code and the abbreviation*):

Added location: loc

Recon: rec

Revision of an existing record: rev

Examples:

- \$d 1loc = An added loc requiring no changes to the bib record
- \$d 3rec = Recon requiring the addition of several name access points to an existing bib record
- \$d 1+ loc =Special collections only: An added loc requiring no changes to the bib record other than a special collections note describing the binding.
